We dedicate this book to the Students of Queen's
upon the Centennial of the Alma Mater Society

THE ALMA MATER SOCIETY

1858-1958

TRICOLOR '58 is dedicated to student government at Queen's which this year is celebrating its centenary.

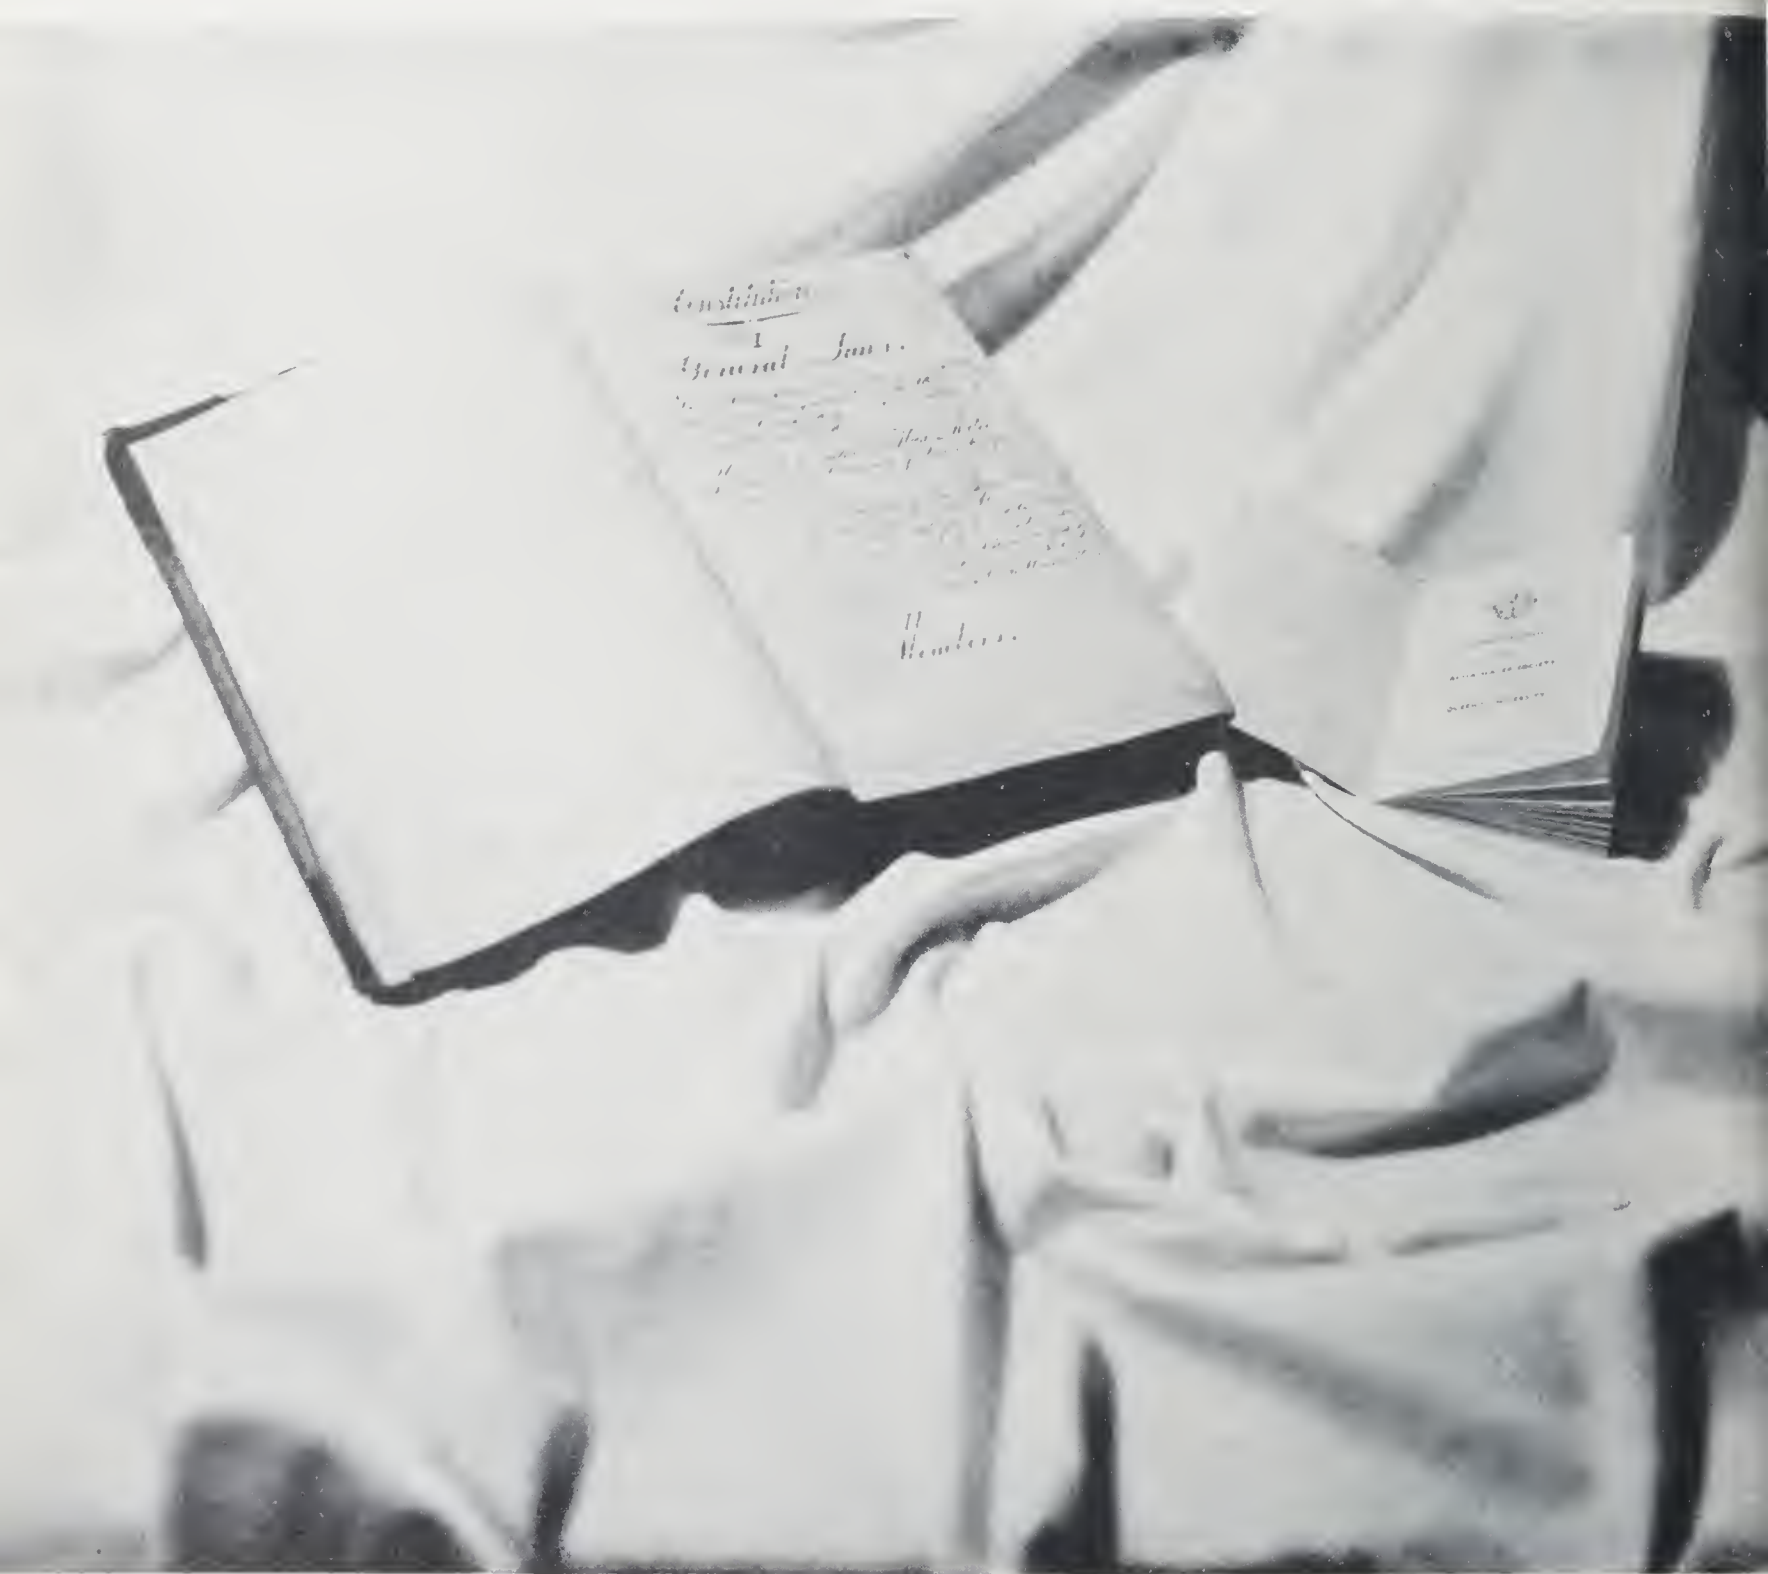

The Alma Mater Society is the supreme student governing body. Like any other organization, the AMS has evolved gradually to its present governmental status. The society in its infancy served as a combination alumni association and student government. But there was little governing to occupy its members, and the society concentrated on debating enlivened by entertainment provided by the various classes. The aims of the original society may be found in the minutes of the University Senate for January 12, 1858: "Maintenance and defence of the students' rights, the interchange of friendly intercourse, the promotion and encouragement of learning and the furtherance of the general interests of the University."

The aims of the AMS have not changed, but the function of the society has become increasingly governmental. The AMS quickly lost its alumni flavour as the enrolment of undergraduates grew. Subsidiary bodies such as the Journal in 1873, Tricolor, the band, and in 1920, the Athletic Board of Control were created. Finances became complicated, as the AMS began to supervise health insurance schemes, the budgets of campus organizations, and grants to student clubs. Now, weekly meetings are needed to keep abreast of accumulated business.

The main guardian of the constitution, the AMS Court, once known as the Concurcus Iniquitatis et Virtutis, is thought to have originated behind a brewery. It provided an excellent means of extracting a fine from some innocent student for the purpose of buying liquid refreshment. As the constitution expanded, and governmental problems grew, the function of the court became more impressive. Court sessions have been infrequent, but when held, are awesome and authoritative. Perhaps the most spectacular case occurred in 1934, when the court found twenty-four men, including four members of the senior football team, guilty of belonging to a fraternity. The Queensmen were forbidden to participate in any type of student activity for a full academic year as a result. Despite this setback, the "Fearless Fourteen," minus the four intrepid Queensmen, thrust on to win the championship anyway.

As the court has always maintained a high standard of common-sense Justice, so has the executive excelled in business efficiency. For more than fifty years, the President was a graduate. Not until 1941 was a woman elected to the presidency, even though women had been members of the Queen's community since 1878. As an aid to the busy faculty representatives, the position of permanent secretary-treasurer was created in 1930. Characterizing the executive members is the prevailing Queen's spirit, that of fierce independence. Shortly after its inception, under Principal Grant, the AMS was twice suspended. Such a development has periodically threatened its existence. For the students tend to forget that the power of the AMS is not sovereign power. Rather, it is delegated by the Senate, and may be taken back should the students forget this.

Despite occasional attempts by disillusioned Queensmen to burn the AMS in effigy, the society today is a vigorous and serious body. Queen's students are proud of their independent position. Tricolor '58 salutes the Alma Mater Society on its hundredth birthday, and wishes it many more years of success.

CONSTITUTIONS OF THE ALMA MATER SOCIETY

In 1858 the constitution was written on the opening pages on the "minute book" of the executive of that year. The original is preserved in the vault of the Douglas Library. Today copies of the constitution are available to every member.

From The Principal

THE year 1958 is remarkable in the history of Queen's University not alone for the distinguished class whose graduation it marks, but also because it is the centenary of the notable experiment establishing self-government at Queen's.

It happened a long time ago. The British North American colonies had not yet united. Rupert's Land and the Northwest Territories were governed by the Hudson's Bay Company. There were still slaves in the United States and one of the routes of escape led across Wolfe Island to Kingston.

It happened at a very small university, quite uncertain of its future. It had one building in use and another under construction. It had only a few professors and a handful of students in Arts, Divinity and Medicine.

In the circumstances, it might seem all very unimportant, but over the century the experiment has yielded large profits in education. The most obvious evidence of the success of the experiment has been the long line of competent, responsible Presidents of the Alma Mater Society who, with their associates, have carried out the functions of student government. I see no evidence that over the years there has been any deterioration in the succession.

I extend my own and the whole University's good wishes to the Class of 1958, which has its own worthy place in the record.

Whether three, four, five or six years have been spent at Queen's, they have gone quickly. Looking back they seem very short years indeed. And yet few years have been so full of experience and growth. No aspect of university life is more interesting and encouraging to watch than the ever-amazing transformation of freshmen into seniors. The timid and tongue-tied become confident and reasonably articulate. The brash and noisy acquire a more seemly restraint. The priggish intellectuals find depth and some feeling of reality. Some, at least, of the indifferent find excitement in their discoveries or in their emerging professional hopes. The uninterested and undisciplined disappear.

The Class of 1958 faces sharp challenges—and so did all its predecessors. The world has become a more crowded and complex place. We have much more information about it and its problems but less coherent views and less confident judgments. In the face of conflicting evidence we are prone to withhold judgment and go about our immediate affairs. But ultimately we must perforce make our judgments, however inadequate our knowledge.

If the world of today offers challenges, it also holds out innumerable opportunities. Never has it offered a more encouraging welcome to every talent and to every willing hand and mind. Whether one's bent is to work with things or with people, whether one's talent is in the world of ideas or of practical affairs, there is a chance to make progress toward one's goal.

What you now know and have woven into your experience will stand you in good stead. But it will only set you on your way. The real test will be what you can learn from now on, what you can make out of your widening experience. This is relevant not alone to your profession or vocation but to the wider field of life itself.

When the Class of 1958 looks back from "twenty, or thirty or forty years on" I hope they look back with satisfaction, affection and pride on the years they spent at Queen's University.

From The President of The Alma Mater Society

DURING the four years we have attended Queen's the world has been in a state of significant change. We have seen a changing Empire in the Far East; we have seen a revolution by an oppressed people; we have seen the path of nuclear physics lead to that terrible destructor, the hydrogen bomb; and, finally, we have seen the emergence of a new age — that of space travel.

These events occurred while we were safely entrenched behind the walls of our Alma Mater. We discussed things in the light of the manner in which they were given to us. Each of us saw these events with different eyes and we were subject to many views. Our conclusions tended to result from a culmination of thought.

At this time, most of us are in our chosen professions. We have finally come to the point where our ideas and ideals can find some realization. We may flinch from what we think is the harsh light of reality, and our tendency will be to busy ourselves in our jobs. The memory of the environment which we have just left will seem very dear. It is the coming few years however which will form our attitudes and determine our degree of usefulness to our fellow men.

We of the class of '58 have emerged into a changing world, a world characterized by fear and distrust among nations. It has been our privilege for a few years to reside in an environment of relative objectivity. This privilege was won for us by those generations of men who believed in an ideal. It is within our power to continue this uplifting of mankind. We must now adhere to those things which we feel are just and right, and we must be prepared to sacrifice for them.

In a number of years most of you will be surrounded with responsibilities. When you look back at Queen's, I hope it will not be a nostalgic look for something lost but rather a fond look at the training ground where you had time to think and to study life.

My congratulations to Tricolor '58 on a fine piece of work. As a memory link to our years at Queen's, I am sure it will serve its purpose well. Good luck to all of you in the days ahead.

GRADUATES

LEVANA

From the Dean

I OFFER my congratulations and good wishes to all of you who have worked to equip yourselves for a rich and fruitful life as graduates of Queen's University. Yours is a goodly heritage. May you enhance it for those who follow after, and find much satisfaction and happiness in so doing.

A. V. Douglas

From the President

FOR the graduating class of '58, a wonderful life at Queen's has ended. Yet, lingering always in our hearts will be found memories of lasting friendships made here, and of the happy times we've shared, of football games where spirits ran high regardless of the outcome, of the blaze of Autumn's colour on those ivy-covered buildings, of a campus blanketed in soft white snow on the eve of a carol service in Grant Hall.

Behind classroom doors, we have struggled to give of our best, to develop our powers of reasoning and understanding; while participation in campus activities wherein we have been able to express our various interests and ideals has brought further enrichment. All these experiences have been shaping us for our future life beyond the protective walls of Queen's, as citizens of a community, and of a nation. Let us endeavour to carry with us the lessons we have learned here, of truth, beauty and tolerance, of freedom of thought and expression, of teamwork and compromise.

To the University for providing the key which opens the door to that vast store of human knowledge of which we have had but a glimpse; to the staff, who, as advisors and friends have so willingly given of their time and energy to guide us in our quest for learning and even for ourselves — our sincere thanks.

And to the graduates — good luck always.

DR. ADELAIDE LOUISE McLAUGHLIN

THE Levana Society feels that it is only fitting at this time to pay tribute to Dr. Adelaide Louise McLaughlin, who, until her death this February, did so much for the women of Queen's.

Col. and Mrs. R. S. McLaughlin were always closely associated with all phases of life at Queen's. They not only took a lively interest in the student activities but also made generous donations to various building funds.

For many years the Alumnae of Queen's had been planning a much needed addition to the women's residence, but were still far from the goal when the more-than-generous contribution of Mrs. McLaughlin enabled them to fulfill their objective. Adelaide Hall, named after the woman who made possible its completion, was officially opened by her in the fall of 1952.

The university recognized the outstanding achievements of Mrs. R. S. McLaughlin by conferring upon her an honorary L.L.D. degree. The citation expresses our final tribute to this remarkable woman as one who

"has done much by her wise and sympathetic guidance to forge the link between home and school, and will long be held in special regard by the women students of Queen's University."

THE LATE MRS. R. S. McLAUGHLIN

SCHOOL OF NURSING SCIENCE

J. M. WEIR
Director, School of Nursing Science

From the Director

YOU have chosen a fine University and a fine profession. As graduates of a university you are a fortunate group; but as graduates you are expected to take greater responsibility in your profession and your community. Your teachers hope they have helped you to prepare for this added responsibility by leading you on the road of further study, an exciting road which we hope you will never feel is a dead-end street. May you continue the enthusiasm which has characterized you as a group. May you find personal fulfilment in the joy of teaching and serving others.

A handwritten signature in cursive script, reading "Jenny M. Weir".

ARTS

K

From the Dean

THE reminder that another graduation time is approaching brings to me long memories of other graduations. The world has always seemed to be at a crisis, but, just as the members of other classes have stood at this threshold with hope which was later justified, you should look forward to lives rich in opportunities for which the years at Queen's have prepared you.

But this is also a time for looking backward; back over the vivid years of mental development when horizons broadened and life took on new meaning; back too, in the mind's eye, to earlier times here and elsewhere which, to you, are only history. You will be making history and, for recapture of the past, records are needed.

The future will bring many changes, and, since all of the class of 1958 will never again be together, this book will often be consulted, especially at re-unions. It will make these great years live again, for here is a record of how each of you looks now and something of what you have done.

This book, then, is a historical document. But now I am writing principally for the occasion when it will be opened for the first time, and so I speak for the whole staff in expressing pride in your achievements and all good wishes to you as you go out into the world. You can never forget Queen's. Many happy returns!

From the President

THE time has come when the Faculty of Arts must surrender another class of graduates from its sheltering arms to the vicissitudes of a hard and bitter world.

To anyone permanently attached to Queen's, this class might be just one of an endless succession of graduating classes containing the usual admixture of talent and mediocrity, of radicalism and reaction. Seen through these eyes this class might appear to be sending into society a collection of precocious impatient young world-beaters whose calling is to rectify all the gross mismanagement of their fathers.

Fortunately for us and for the nation, society will not let us take over for a few years. When we have finally proved ourselves, I hope we never become so engrossed in matters of import that we cannot spare a thought or two for Queen's.

And when we think of Queen's, it will be in terms of Arts '58, the year that entered with a riot and went out quietly with the first century of student government. Our conception of Queen's will reflect the countless unique and interesting acquaintances, the many warm and enduring friendships that breathed life and memories into this institution.

Good luck to you all.

Professor

Frank Knox

PROFESSOR Frank A. Knox is Director of the Institute for Economic Research at Queen's University and Professor of Economics. He has been on the teaching staff at Queen's since 1923 and for many years was head of the Department of Political and Economic Science.

Born and brought up in Orono, Ontario, a village 50 miles east of Toronto, and the son of a businessman, Frank Knox attended public school and high school in Orono, and then Peterborough Normal School. He taught at Oshawa and at Orillia where he was principal of the public school in 1914-15.

In 1915 Frank Knox enlisted in the Simcoe County Battalion, the 157th, as a private, and went overseas in the fall of 1916. In England the unit was split up and Mr. Knox was transferred to the 116th Battalion, Third Canadian Division.

During the next two years he saw active service in France, later being a musketry sergeant with his division in France. In March, 1919, he returned to Canada.

In the fall of 1920 Mr. Knox entered Queen's University as a student, majoring in history and economics. He graduated from Queen's in 1923, was offered a lecturer's post in the following year, and has been at Queen's ever since. Mr. Knox undertook graduate studies at Harvard University and at the University of Chicago.

In recent years he is probably best known as the chairman of the Committee of Inquiry into the Economics of the Gold Mining Industry in 1955. The Knox Report which was put out by the Ontario government is one of the most impressive of its kind. For many years Professor Knox also has been editor of the Journal of the Canadian Bankers' Association and as such has become widely known to business and finance.

In 1922 he was employed by the McMillan Commission — later the Rowell-Sirois Commission — and for two years he served part time with the Department of Finance, Ottawa. As one of O. D. Skelton's 'boys' Frank Knox was a member of the band of young economists who have left a mark on the Canadian economy and parliament.

As a man he is mild-mannered, clear-browed, and never raises his voice. His pronouncements have a way of penetrating the minds of his audience and his class. It is probable that this is one of the factors which have made Professor Knox, and his courses, so enjoyable to the students who have heard him. This is also probably one of the main reasons why he is proclaimed on the campus as one of the great lecturers.

THE DEPARTMENT OF INDUSTRIAL RELATIONS

First Row: P. Drouillard, Mr. F. J. L. Young, Prof. C. H. Curtis, Prof. J. C. Cameron, E. Matheson.

Second Row: G. U. K. Rao, J. Clifford, S. Robertson, P. Barry, M. Hawley.

Third Row: J. Donaldson, I. Watson, R. Sircom, J. Hunter, D. MacEachern (Pres.)

From The Director

THE Department of Industrial Relations was founded in 1937 in response to a frequently expressed need for a clearing house for information on problems of employer-employee relations. The Department keeps in touch with industries, labour organizations, government departments, and institutions in related fields of work, and assembles the information gathered in its library.

The Department is responsible for instruction of students enrolled in its Professional Course as well as undergraduates in the School of Commerce and the Faculty of Applied Science. During the last ten years, the great growth in the Canadian economy has resulted in an increasing demand for graduates to fill positions in personnel departments across Canada. Former members of the Professional Course are to be found in many of those departments.

Over two hundred and ninety students have completed the Professional Course since its initiation. While the course is essentially a graduate course, enrolment is not limited to Queen's students alone. Graduates from most Canadian Universities, from the United States, from Scotland, from India, and from Greece have been awarded the diploma upon the successful completion of the course.

Since its inception the Department has published numerous bulletins dealing with topics of current interest.

Conference and short courses for industrial relations practitioners are held at irregular intervals as the need arises.

James C. Cameron

SCHOOL OF PHYSICAL AND HEALTH EDUCATION

From the Director

ONCE again it is my privilege, on behalf of the Staff in the course in Physical and Health Education, to say good-bye and good luck to the graduates of 1958. During the past four years, we have been associated with you in many situations and we have shared many experiences together. We have found you to be serious in your work, whole-hearted in your recreation, and competent and co-operative in carrying through your assigned projects.

We are sorry to see you go because we will miss the friendly associations that we have had with you. However, we are glad to see you go because we know that you will be capable and loyal members of the great army of Queen's graduates who have dedicated themselves to holding high the good name of the University.

F. L. BARTLETT
Director, School of Physical
and Health Education

SCHOOL OF COMMERCE

58

From the Director

YOU are the first class to graduate in the "space" era and I might have chosen to employ these lines in speculation on the implications (if any) of Sputnik for the Queen's Commerce graduate.

But I am writing this immediately after being visited by a member of the class of '53 whom I had not seen since graduation. As we parted, I told him that visits from old students were the breath of life for me and my colleagues. And in that sentiment lies buried the message I would convey to you as you graduate. You go away from Queen's but you leave some part of yourselves here and you take away with you some part of us. Everything that you do or try to do, everything that happens to you, is a matter of interest and concern to those who guided your studies while you were here.

We look to you with confidence to contribute integrity and intelligence to the business life of Canada, and we hope you will derive satisfaction and happiness from doing that alone — no matter how much more you accomplish.

COLLEGE OF THEOLOGY

ELIAS ANDREWS
Principal, College of Theology

From the Principal

THE annual message to students graduating from College is a reminder of how quickly the years pass. The older one grows, the greater the astonishment at the swiftness of the time-process, warning us that what is to be done must be done well and quickly. To learn, as early in life as possible, the value of our fleeting moments, and to fill them up with what is best and most lasting in intellectual and spiritual development, is the surest way of achieving the true purpose of life. No other approach to the business of living can expect to discover the deep satisfactions in knowledge, stability and faith, which come to those who make a proper assessment of their days and apply their "hearts unto wisdom."

This approach to the work of the Christian Ministry we covet for the class going out this year. Great demands are being made on the ministry of the Church in these days when our life is growing increasingly more complex. Only the man who is aware of the significance and the urgency of the ministry that the servant of God can bring to those who are perplexed and burdened with the many and varied circumstances of every day affairs, is capable of organizing his own life with such adequacy as will fit him to deal honestly and devotedly with the folk to whom he is privileged to minister. Our prayer is that great grace may be given to those who go forth from the Theological College this year.

Elias Andrews.

APPLIED SCIENCE

K

From the Dean

ONCE again spring is approaching, a time when you will be looking forward to packing up your textbooks and reports for a while at least.

After four years of steady work, it may be difficult to appreciate the need of further development. However, I am confident that in a short while you will see the advantages of organizing for yourself a modest programme designed to develop those talents which unfortunately may have been neglected during the stress and strain of satisfying the requirements of your degree. It is encouraging to talk with graduates of five years ago and learn of their interest in night classes, civic organizations, church work, and in general, community social responsibilities.

The young graduate engineer is assuming a position of increasing importance in the life of his community. With the privileges of such a position go the responsibilities. The world in which he must take his place is a world with a good mixture of hope with its beckoning horizons and the fear born of the uncertainty of what lies beyond those horizons. The advance of Science has been and will continue to be rapid, uncovering new things at a greater rate than society can fit them into our way of life without undue disturbance.

The Scientist and the Engineer have a real responsibility in shouldering their share of the solutions to the social problems resulting from this rapid advance in technology.

I have every confidence that you as newly graduated engineers will strive toward a well-rounded personality, valuable to society and successful in those important things which will make your life a full one.

Best wishes for the future.

H. G. CONN

From the President

AS we go out this year to take our place in the community after four rewarding years at Queen's we will be carrying along with us many memories of moments gone by. On pausing a minute to look back we recall such experiences as the guarding of the stadium, the day Toronto got a zero, our two all out but unsuccessful efforts to capture the Bew's Trophy, the day the goal posts ducked and the Gold Rush to the Klondike, only to mention a few.

Most important, of course, are the long and interesting hours of study which have provided us with a basis for the practice of a liberal profession. As we branch out into various fields of engineering such as production, research, design and sales it will be up to us to prove to our employers and colleagues just why Queen's is so proud of her graduates.

We have been given the opportunity to participate in the Queen's way of life and are now ready to join the Queen's family. To the Faculty members, the memories of whom will not be forgotten, go the most sincere appreciation and thanks of the class of Science '58 for their guidance along the road of learning and preparation for the engineering profession.

Bill Sexsmith

*Professor
Arthur Jackson*

PROFESSOR ARTHUR JACKSON became the first permanent secretary of the Faculty of Applied Science in December, 1930. During his tenure of office he carried on his duties with skill, judgment and understanding which earned the unanimous approval and admiration of the Faculty.

With increases in numbers of staff and students alike, Faculty problems steadily increased in complexity. That these difficulties were successfully met was in a large measure due to Professor Jackson's clear thinking, incessant industry, and to his patient understanding attitude with students and staff. His unsurpassed acquaintance with individual students and his splendid spirit of co-operation made him the ideal man for this work. His minutes of the meetings are models of accuracy and detail and, reading them, one would surely obtain a good picture of the man who prepared them, and would realize they are a fine memorial to the quality of his work.

It is doubtful if any student in the Faculty of Applied Science at Queen's will not freely admit that Professor Jackson has had a profound influence on him, created by his example, his genius for friendship, and his interest and participation in the affairs of the students.

May he and his kind live forever.

M E D I C I N E

From The Dean

TO become a member of the Class of '58 was a piece of good fortune; to graduate is an achievement. A degree in medicine is not obtained by making friends and influencing people; it is a product of hard work. So, I congratulate the graduates, and wish them well. Six years in Kingston doubtless seemed a long sentence in the fall of '52; in retrospect you will think of them as a brief nostalgic period, punctuated by vivid memories of triumphs in the examination hall, the football field and the gymnasium, of financial worries and warm friendships, and of sympathetic and capable teachers.

You leave Queen's at a critical period in the practice of medicine. The people of Canada will soon be introduced to a "free" hospitalization scheme. This is regarded as a prelude of some sort of governmental control of physicians' services, which will upset the current independence of the doctor, making him a civil servant. This may not alarm you, but it causes great uneasiness among men in practice, lest it burden them with excessive bookkeeping, and a plethora of calls for trivial ailments, and lead to a deterioration in service to the genuinely sick patient. I wish you wisdom and good fortune in coping with this serious problem when you complete your graduate training and set up practice.

G. H. ETTINGER
Dean, Faculty of Medicine

From The President

ANOTHER stage in the endless gyre of learning has been successfully accomplished by our graduates this spring. The members of the Class of '58, prepossessed with their progress, are yet justified in reviewing their six years' stay at Queen's with reticent joy - complicated perhaps by pensive sadness.

Although knowledge itself has been contributed to the graduates by the university, the experiences gained through close association with great men preponderates in their maturation process and now enables them to embark upon society as capable doctors. Through such association they have come to realize the importance of devotion and sincerity, humility and charity; to them also has been imparted an insatiable thirst for experience, learning, and good judgment, reminding one of an excerpt from Alexander Pope's Essay on Criticism II:

"A little learning is a dangerous thing;
Drink deep, or taste not the Pierian spring:
There shallow draughts intoxicate the brain,
And drinking largely sobers us again."

We, the under-graduates, sincerely regret your departure from the campus. We extend our best wishes and are confident that success and happiness await you.

AL. DEEP
President, Aesculapian Society

A MAN CALLED MATTY

IN the new university medical building at Stuart Street, there is the room which has been eagerly awaited by many years of graduating classes to become true -- the first major common room for the senior medical students. This room will be used for the first time in the fall of 1958. It will be called the D. C. Matheson Room.

Dr. D. C. Matheson, who for the past forty-six years has been associated with the University, has retired as Professor and Head of the Department of Anatomy. Through his devotion to the task of teaching Anatomy, he has won the respect and affection of nearly four decades of Queen's medical graduates and undergraduates.

When it was learned, unofficially at first, that Dr. Matheson was retiring last year, there was a movement among the members of the Society to honour the man who gave Anatomy the greater part of his life: a dynamic interpretation of our appreciation to a man who has become an institution in the medical quadrangle.

There were many testimonials to Dr. Matheson on his retirement. The March, 1957, issue of Queen's University Medical Review was entitled 'The D. C. Matheson Issue.' The medical issue of the Queen's Journal contained articles about Dr. Matheson. In the congratulatory letters which the writer received, warm and kind words were uttered which could only be attributed to a teacher like 'Matty'. One wrote, "I have genuine affection and respect for Charnock Matheson because he seems to have many qualities that I do not possess myself. There is an innate modesty and a sense of dedication . . ." A graduate of Medicine '30, who is now an internist in the U.S.A., states that "We of Medicine '30 have the highest regard for Matty. He is the salt of the earth."

A fund, called the Matheson Fund, is being established by the Aesculapian Society. This fund will be used exclusively for the decoration of the D. C. Matheson Room. This room is our tribute to Dr. Matheson, and will continue to remind us of his great contribution to our Faculty of Medicine.

DR. D. C. MATHESON

Student Government

Alma Mater Society

FEW areas of student life are unaffected by the Alma Mater Society. Its scope is defined in the most general of terms: a bond of union among students, alumni, and graduates; a communicating link between the students and the University; a means of promoting literary and scientific taste on the campus; and finally, the engendering of a sense of responsibility in the students which will serve the best interests of the University. Accordingly, the Society has established an Executive which has control over all legitimate enterprises of a non-academic nature. It has further provided for the A.M.S. Court, the supreme tribunal of the student body, whose decisions cannot be overruled by the Executive. Interpretation of the A.M.S. Constitution and grievances concerning individuals of the Executive are within its jurisdiction.

The Executive governs mainly through the use of committees. Three are of special importance and are designated as standing committees. The Tricolor yearbook is the annual official publication of the Society and endeavours to present a comprehensive pictorial and written account of each college year. The art of journalism finds expression in the bi-weekly editions of the other publication of the Society, the Queen's Journal. Athletic activities are supervised by the Athletic Board of Control.

Periodically, other committees have been formed to fulfill the purposes of the Society. The most recent is the Welcoming Committee which is responsible for such enterprises as greeting visiting dignitaries and organizing pep rallies. It is ably supported by the Band which trains students interested in band music and performs at many campus functions. A senior member of the Executive heads the most active one-man committee on the campus—External Affairs. He acts as a liaison officer between the Society and all campus organizations with external affiliation and is particularly diligent in the affairs of the National Federation of Canadian University Students.

Unforeseen circumstances necessitate the creation of ad hoc committees to direct specific activities. For instance, such a group was formed in 1956 to administer the campaign for Hungarian Relief. Other services provided by the Society include a comprehensive health insurance plan for the students and an annual address by an eminent person. One of the leading social events of each year is Color Night when the Society honours its athletes and student representatives with a dinner and formal dance.

Financial co-ordination and direction is the responsibility of the Budget and Finance Committee. It serves as a treasury watchdog and supervises grants to deserving campus organizations. All matters of student concern are under the surveillance of the Executive which meets regularly to administer the affairs of the Society.

The students are proud, and rightly so, of the freedom granted them in the direction of their activities. Not only is their Executive involved in a wide range of endeavours, but their Court has the responsibility for policing the students and, in the first instance, for trying offenders of the accepted norms of student conduct. These responsibilities have not been accepted lightly in the past: the future importance of student self-government will be assured if this tradition is firmly upheld.

A black and white group photograph of eleven men, likely a sports team or club, posed in two rows. The front row consists of five men seated, and the back row consists of six men standing. They are all dressed in formal attire, including suits, ties, and bowties. The man in the center of the front row is wearing a bowtie. The man on the far right of the back row is wearing glasses.

Back Row: G. SOUTHALL, G. BALLANTYNE, A. GRETSINGER, J. PRICE, R. SHARPE, K. PURDON, R. NICHOLLS.

Until 1911, the Principal of Queen's Theological College also held the office of Principal of the University. In the year of our Lord one thousand nine hundred and twelve, the College was separated from the University by an act of Parliament. In 1925, with the formation of the United Church of Canada, Queen's Theological College cast its lot with that church, and thus became a United Church College.

The students of Theology have always been an integral part of campus life, though their extra-curricular activities have been limited by their added responsibilities of carrying on full time pastoral church work. Nevertheless, we in Theology feel that we are part of the great Queen's family.

81

Arts Society

THE Arts Society is the governing body of the 650-odd male students registered in the Faculty of Arts. Membership in the Society is the common bond of all men in Arts, whether they be registered in Music or Geology, in Commerce or Physical and Health Education, in Spanish or Industrial Relations.

The Society was established in 1868. The impetus for the founding of the Society came from its first president, Angus R. McNab of Art '71 whose conception of the Society, expressed in the original charter, was that it should function for the "preservation and extension of the humanities and the liberal arts and the promotion of free and unfettered thought." Thus the Society in its original form was an academic association in no way functioning as an organ of student self-government.

By the inexorable logic of events, the Society found its place as the organization most truly representative of the students in Arts, and with the defection from its ranks of the women in Arts in 1889 and the institution of a separate Faculty of Applied Science it began to assume its role as spokesman of the distinctive interests of the men in Arts.

Today the Arts Society functions almost exclusively as a student government body, to the exclusion of the former aim of "promoting free and unfettered thought." Perhaps its most distinctive contribution to University life is the Arts Concert, instituted several years ago. Through the institution of the Arts Concert the campus has been able to hear the music of artists like Alec Templeton, the Leslie Bell Singers, and Dave Brubeck.

The Society has also undertaken to maintain an Arts clubroom on the ground floor of Kingston Hall. Until 1955 this was exclusively a men's convenience, but in that year it was completely refurnished and redecorated and opened to both men and women as a study room. The clubroom is supplied with all the popular periodicals.

The Arts Formal is the Society's largest annual project. The Formal strives to give its patrons the highest standards of music, decorations and entertainment at reasonable expense.

Besides these major projects the Society undertakes a multiplicity of minor administrative tasks. This year it embarked on a programme wherein it will co-operate with the Levana Society in fields where the functions of the two Societies tend to overlap.

The principal aims of the Arts Society, outlined in the Constitution, are to serve as a bond of union and to promote the general interest of the Arts Faculty. Because of the "infinite variety" found within the Faculty seemingly "unwithered by age and unstaled by custom," the achievement of these aims is often difficult.

Nonetheless, the field for contributions to student life in the Faculty of Arts is large, and there is every indication that in future years the Society will assume an increasingly important role in campus affairs.

Levana Society

WHILE we are celebrating the hundredth anniversary of student government at Queen's, it might be interesting to note the changing status of women students over the years. It is difficult for us who enjoy such a full campus life in 1957 to picture the university of a hundred years ago, where only men filled the corridors of the Old Arts Building, listened to inspiring lectures delivered by dedicated professors and tasted of the cup of higher learning. For it was not until 1870 that Queen's opened its doors to women.

By 1889, the thirty women undergraduates in Arts and nineteen in Medicine quite understandably felt the need for some unifying organization. Thus the Levana Society came into being, named, at the suggestion of a learned Classics professor, for a somewhat obscure Roman deity whose obligation to mortals was, metaphorically speaking, to raise the eyes and aspirations of mortal infants from the earth toward the stars. The society's early ties with the Y.W.C.A. were gradually severed, but records of those early meetings, with their mortarboard bees, their frantic planning for Levana formals, which were held usually on two successive nights (Some of the more popular young men, we are told, even managed to wangle invitations to both!), and the impassioned speeches on women's suffrage, still make fascinating reading.

With the passing of each year since 1889, the women of Queen's have played an increasingly important role in all aspects of campus life: academic, athletic, organizational, and social, sharing the responsibilities entailed in war service activities during two great wars, and ensuring effective participation by Queen's in international programmes for study, understanding, and relief. In the spring of 1939, the Levana Society was granted three seats on the newly organized A.M.S. executive, in recognition of the valuable part women could play in university government. Enriched by their activities and comradeship in Levana, Queen's women have gone forth from the university, some to still further scholastic achievement, some to important executive and educational posts, to the professions, to the business world, and most often to the home.

Needless to say, the organizational changes in Levana over the years have been many, its system becoming more and more complex with each additional undertaking, until, at present, there are at least a hundred girls actively engaged in committee work. Each year, the society faces new problems in its attempt to mould itself in accord with the changing needs of Queen's women.

Sparked by a keen interest this year among both its own members and others too, the Levana Society has taken thorough stock of its constitution, with a view toward better serving the needs of its members. It is to be hoped that with the proposed changes, the girls in Medicine and Engineering will feel an integral part of our organization, and that, at the same time, closer ties with the Arts Society through co-operation on projects of mutual interest will make both groups more effective. The formation of the Joint A. and L. committee this year, with its proposals for a co-ordination of the year executives with those of the two societies has been an important step toward a further integration of students in the Arts Faculty. But what Dean Douglas said of the Levana Society holds true for any other university group: "Its effectiveness in the life of each member and in the corporate life of the campus is always dependent on the participation of the members and the new ideas which each generation of students brings to it." The responsibility for ensuring the continued effectiveness of Levana rests with you who are its members.

Aesculapian Society

IN keeping with the advances made by Student Government at Queen's during the past century, the Aesculapian Society, founded in 1872, today enjoys the benefits of eighty-five years of tradition and fertility. Although the objects of the Society have changed somewhat since that time, sufficient fragments have remained to identify absolute continuity and similarity of ideas and aims over the years.

General meetings of the Society back in 1890 were musicales and debates, the first topic being "Is the bile secreted from the systemic or the arterial blood?" The modern trend favors panel discussions including such topics as "Euthenasia," "A National Health Plan for Canada," "Birth Control," and "A Responsible Approach to Marriage," presented during the past two years. These programs have been designed to be of universal appeal to all Queen's students and to make a substantial contribution to the cultural aspect of the Queen's way of life. The large attendances witnessed have proclaimed these productions very successful.

At the turn of the century, the annual Medical Dinner was initiated, and in 1900 the guest lists included such names as Lord Minto (Governor-General) and Sir Wilfred Laurier. This event is now fostered exclusively by the Aesculapian Society. It functions for the presentations of the Aesculapian Key to the members of the fifth year, and promotes excellent student-faculty relationship.

The Society, in 1942, began a Building Fund with the initial goal of \$50,000 to provide executive rooms, office space, recreation rooms, and club rooms for the members. The Society generously donated \$1,105.00 of its fund to the new Union in 1948. Accumulation of money had been slow, but this year new blood enlivened the campaign and the fund is growing considerably. A portion of this fund is being used this summer to furnish a segment of the new University Teaching Building consisting of a common room, an executive committee room, a kitchen, and a lunch-room. At the Society's Testimonial Dinner to Dr. D. C. Matheson this year, the Society announced plans to dedicate the main common room to commemorate the name of Dr. Matheson. We hope that this year's enthusiasm will be a precedent for future executives.

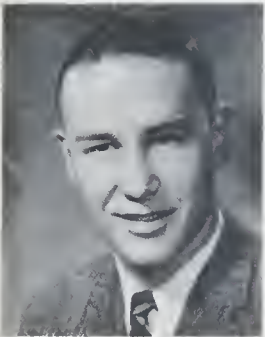

C.A.M.S.I. also this year has been rejuvenated in an attempt to establish a preceptorship programme whereby medical students can live with general practitioners for two weeks during the summer to observe the administration of their practices; a Student-Faculty Relationship Committee has been set up to deliberate, in a responsible fashion, student and Faculty difficulties; the Medical At Home was successfully brought back again to Grant Hall this year in order to ruthlessly slash the dangerously high budgets of previous years; the bi-annual Society publication, the Queen's Medical Review, (stemming from the Medical Log in 1935) still enjoys masterful editorship; the privilege of five "call days," granted to Aesculapian President G. Malcolm Brown in 1937, is still ecstatically guarded; freshmen initiations have been reevaluated recently in a co-ordinated attempt by the "soph brothers" and "senior brothers" to guide the tyros through a mature re-orientation programme.

Continuity has been achieved in part by the constitution, but the Society is deeply indebted to our Permanent Secretary-Treasurer, Dr. E. M. Boyd, first appointed in 1936, and one-time President of the Society.

By virtue of its traditions, leadership, fertility, continuity, and maintenance of harmony, the Aesculapian Society has justified its existence as a powerful and integral force in Student Government at Queen's and takes great pride in commemorating its One Hundredth Anniversary.

Engineering Society

THE Engineering Society of Queen's University was formed sixty years ago to represent the student interests of those enrolled in the School of Mining, the predecessor to the Faculty of Applied Science.

Objectives of the Society have been: 1) to cultivate the spirit of mutual assistance among its members in the practice of the engineering profession; 2) to control all the matters affecting the interest of applied science students; 3) to serve as a medium of communication between the members of the Society and the governing bodies of the University or any recognized Society; 4) to promote the general interests of the University; 5) to promote professional interest and to foster the high standards in the profession. With these aims in mind the 1898 executive laid the basis of a society student government which has proven successful in fulfilling many of the very necessary elements of our democratic way of life.

Among the very first projects undertaken by the early executives were the annual dinner held by the graduating class and a dance which was to be sponsored by the School of Mining. The annual banquet, which has been described as "the great event of the season," was dropped in later years. Although the turnouts and preparations for the yearly dance were small at first, this event has, down through the years, developed into the present day production of the Science Formal which is one of the highlights of the fall line-up of activities on the campus. It is interesting to note that Science '58 has decided this year to take up the banquet idea again and are planning this event to coincide with the iron ring ceremony of the graduating class.

It was realized by various executives at the turn of the century that a more reasonable price for the great volume of technical supplies required by the students could be obtained. In 1909 a committee consisting of the senior members of the executive was formed which thoroughly investigated these possibilities. The following session saw engineering undergrads on a part time employment basis selling text books at reduced rates in a small room in Fleming Hall. Due to the increase in volume of sales the Engineering Society took it upon themselves to set up a subcommittee called the Service Control Board which includes representation from the staff and from all four years of engineering to co-ordinate the activities of the technical supplies.

Many individual donations by alumni of the Faculty of Applied Science and undergraduates were made toward a permanent building to house the operation of the book store and a clubroom for the students. Although this fund was established as early as 1921 when the Fifth Field Company voted to fund their entire pay for one year to this cause, counter proposals for the erection of such a building were not presented until the late forties. Construction began in the spring of 1951. By the fall our Technical Supplies, now located in its familiar home of Clark Hall, named in honour of our late Dean A. L. Clark, was open for business. Of equal direct benefit to the student of course was the magnificent and very comfortable clubroom provided for us on its second floor. Due to present expansion, excavation will start this spring on a basement under the existing building. Half of this area will be set aside for storage space for the technical supplies of the book store while the remaining half will provide an extension of clubroom facilities for our ever increasing Faculty which now has an enrollment in excess of one thousand.

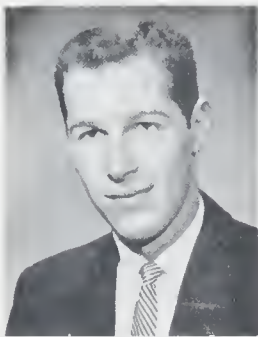

Certainly our very active predecessors have provided us with a brilliant list of achievements. Only through the promotion of such a progressive attitude as that developed by former executives, will present and future members of the Engineering Society be able to carry on its outstanding record.

Law Society

ON October 16, 1841, a Royal Charter was granted to Queen's University. The desire for a Faculty of Law was expressed as early as June 1, 1847, when the Trustees of the University resolved that they would ask some influential member of the Legislature to introduce a bill which would enable Queen's graduates to be admitted to practice at the end of three years instead of five. The bill was passed July 28th of the same year.

There was no further move until 1853, when it was resolved that a Faculty of Law be established as soon as possible. In 1861 it was announced that final preparations for a Faculty of Law had been made and the Honourable Alexander Campbell, M.L.C. was appointed Dean. In spite of the fact that the Law Society of Upper Canada refused to recognize the work at Queen's as a substitute for attendance at Terms in Toronto, work was continued. The first L.L.B.'s were graduated on April 28th, 1863. The success was unfortunately short lived, and classes were discontinued in 1864 due to financial difficulty.

The Faculty lay dormant until 1880 when it was decided to revive it. This was effected in 1881 but it lapsed again in 1884. In 1889 the Law School in Toronto was established, and the Law Society required that all law students attend and pass its 3 year course before being admitted to practice.

Meanwhile, Student Government, an institution equally desirable on the Queen's Campus, was meeting with more success. On January 12, 1858, a memorandum from the students was read in the Senate asking their support for "A society to be formed for the maintenance and defence of students' rights, to serve as medium between staff and students, to promote the general good of the University, her graduates and alumni." This was approved by both Senate and Trustees and became known as the Alma Mater Society. Since then it has developed from a debating club to an executive made up of representatives from all faculties. It is responsible to both students and staff not only for the deportment of students but also their ideas and interests expressed through the sixty clubs and societies on the campus.

This year student government celebrates its Centenary and also absorbs a new Faculty. When the Law Society changed its stand in 1957 a Faculty of Law was again established at Queen's. This time with all interest in its favour it is here to stay. Let us hope that 100 years from now we can look back and say that we have been as prominent a figure in our University's notable career as the Alma Mater Society has been in the last 100.

SPRING AND FALL CONVOCATION

AT SPRING CONVOCATION for the year 1956-57, held on May 18, five hundred and thirty men and women received degrees from the faculties of Arts and Applied Science, and from the Theological College, the School of Commerce, and the Department of Physical and Health Education. Honorary doctorates of law, divinity, and science were presented to thirteen outstanding Canadians and Americans.

FALL CONVOCATION, on October 12, saw the presentation of the honorary degrees of Doctor of Laws to three noted Canadian lawyers. Principal Mackintosh reported on the gradual increase in enrolment at the university, and noted the necessity of providing new buildings for the accommodation of these extra students. Following the principal's address, Mr. E. C. Leslie, Q.C., former president of the Canadian Bar Association, discussed the newly-formed Law School at Queen's and stated that this school should become one of the centres of legal research in Canada.

ORIENTATION

THE FIRST ORIENTATION WEEKEND for Arts Freshmen was held September 21 and 22, 1957. Instead of the usual introductory lecture following registration, the freshmen were given a real opportunity to know the ins and outs of life at Queen's, both academic and social. Saturday morning opened with a welcome by Dean Earl and addresses by Co-Chairmen Dr. Tracy and Bob Little. Talks on subjects new to freshmen given by various faculty members followed. In the afternoon, panel groups of senior students answered any questions that arose from these lectures.

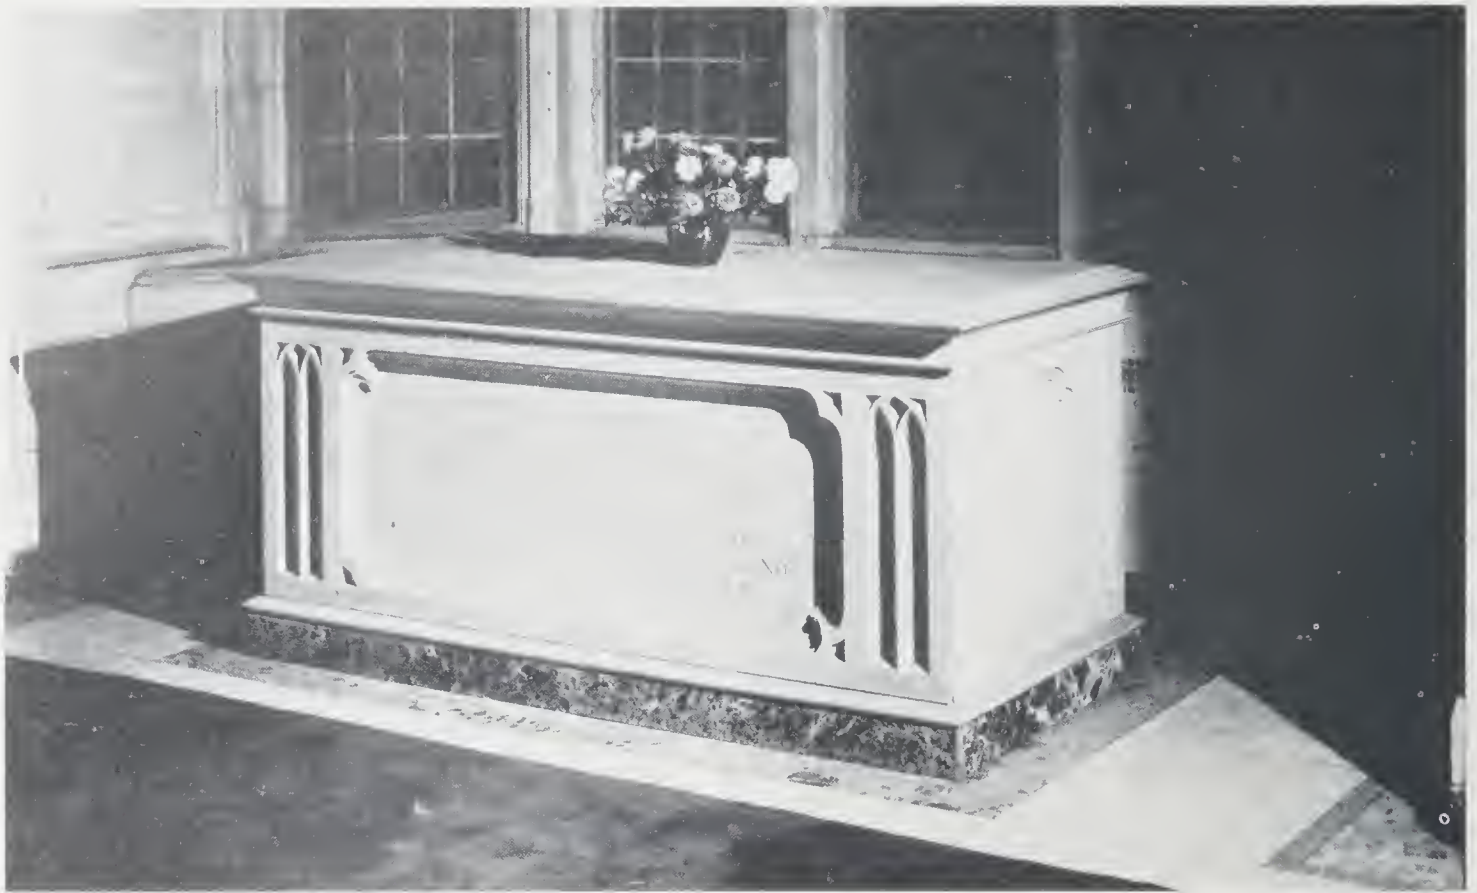

On Saturday night a party was given in Grant Hall for all Arts freshmen, during which excerpts from various Queen's productions of the year 1956-57 were presented. On Sunday morning, Padre Laverty officiated at a University Church Service at Grant Hall.

The success of the weekend has led to the formulation of more elaborate plans for Orientation in 1958-59.

135

Religious Services

WHAT the world needs is an intelligence that sees the interdependence of all men and a religious spirit that sees all men as brothers. These are the qualities of mind and heart that an University should cultivate instead of that "healthy skepticism" which creates a vacuum mere dubiety cannot fill.

This University is concerned to lift its students to an awareness of their more than animal and their more than erudite potentialities, being committed to Francis Bacon's view that "knowledge is a rich storehouse for the glory of the Creator and the relief of men's estate."

PHYSIOLOGY BUILDING

THE first step in the Queen's \$9,200,000 expansion programme is being taken this year, with the completion of the new physiology building and the construction of a men's residence, a civil engineering building, and a new medical building. Remodelling and extension of existing buildings has begun, with repairs to the Old Arts and Medical Buildings, and two new women's residences have been bought to replace the old Matheson House. In order to have the opportunity to view important art collections, the Art Centre has been added as a permanent site for these exhibits.

Additional laboratory space, residences, and buildings for The School of Commerce are expected to be completed within the next five years to provide accommodation for the increased registration at the university.

She sat before me wild and wan,
Her seat reposed upon the john,
Her calculus upon her knee,
Her fifth form eyes confronting me.

"Oh! What befalls
Within these walls?"

Her trembling heart surveyed the scene:
A drowning in a sea of Drene!

I smiled . . . and took her hand
And led her through our Promised
Land.

You see these damsels drinking tea
in perfect domesticity?
They're just a blind.
Above you'll find
the wildest sort of revelry.

The fiddle's diddle,
the maiden's scream,
(they're making garters rather long)
the needle's click,
the crunch of Ritz,
and raucous voices raised in song;
the garret light,
the brains that pop,
the wee small hours that bloom and drop.

While to the bored their wounds I'll salve
With "Grandma! What nice legs you have!"

Have you ever tried unpacking
When your bed is full of stuff?
Have you ever tried to swallow
When you think you've had enough?
Have you had a birthday lately
With presents, pop, and cake?
Have you had a wistful moment
When the five o'clock you take?
Isn't it a sin
When you think you're thin
To be asked to be Santa Claus?

My new found friend
 surveyed the view.
 Her expression
 was thoughtful,
 her comments few.
 She watched a bridge game
 have its start
 And absentmindedly
 played a heart.
 She told a joke
 to the gang downstairs
 And taking the guitar
 beat out a few airs.
 She said "Oke"
 In a sleepy way —
 "I think I'll stay."

McNEILL HOUSE

FROM A LEMONITE . . .

Beyond the pale of girlish penetration,
There lurks a superfluity of august masculinity,
All objects of the deepest adoration.
We love the tuneful palate, and the forcefulness, 'tis said,
That guns those souped-up jobs along and jars us up from bed.
We love the way that he composes
The manner that he dozes
One pains the trembling eardrum
And the other wrecks the spread.

CENTRAL COMMITTEE

D. COOPER, MR. R. L. WATTS, B. PERCIVAL, D.
NOWLAN, L. ROBBINS, D. SINCLAIR, D. MUNRO.

We are constantly amazed
 That his studies aren't a fuzzle,
 By the quarts that he can guzzle,
 At the times he needs a muzzle.
 But if more reasons each insists,
 We love them for their hairy wrists.

STUDENTS' MEMORIAL UNION

HOUSE COMMITTEE

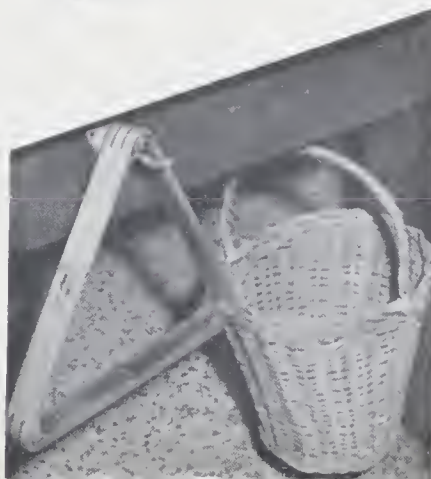

RALPH WARREN, BILL CAMERON, MR. J. E. WRIGHT (Warden), JOEL CAMERON (Chairman), JOHN HUNTER, OWEN DAUB.

The Students' Union, bless its heart,
Stands solid as a rock . . .
Inside its famous Wallace Hall,
The men eat boiled pork hock.

Some Spanish, Swiss, or Russian steak
Is served up every day
To teach us basic geography
In a rather tasteless way . . .

Downstairs, at billiards, students play,
While in the reading room,
A turning page but briefly breaks
The silence of the tomb.

We love the Union, just the same,
From basement to front door . . .
It stands, so proud, in memory
Of Queensmen dead in war.

Athletics

HERB HARMER
AMS President

DAVE NOWLAND
AMS Athletic Stick

JUDY REID
Pres. Levana A. B. of C.

ATHLETIC BOARD OF CONTROL

THE Athletic Board of Control has been a standing committee of the Alma Mater Society since 1921 and has supervision over the athletic interests of the Society. It has direct control of intercollegiate sports, and handles the finances of intramural activities, which are looked after by Intramural Councils. Representing the students on the Board this year have been Herb Harmer, Judy Reid, Dave Nowland, and Bob Morrison.

Operating on a budget of close to \$100,000. of which slightly over a third is contributed directly by the students, Secretary-Treasurer Charlie Hicks is kept busy balancing expenditures. The balancing has been made more difficult this year because of the lack of play-off games in football and poor weather at several of the regular games.

In other business the A. B. of C. considers requests for the use of the gym, stadium, rink and pool. In the spring of 1957 arrangements were made to billet twenty-four Hungarian students in the gym. This year the Board is attempting to revive an Inter-collegiate Water Polo team. Exhibition games were arranged with Toronto and McGill and if enthusiasm in the sport continues, the Board hopes to have the team recognized in the Intercollegiate series next year. In conjunction with the AMS executive the Board has formulated a new policy for the Colour Night Banquet. Free tickets to this Banquet and the Colour Night dance are given by the Board to athletic award winners.

WELL, WE HAD FUN

1957 Football Season

PERHAPS the best manifestation of the Queen's spirit was demonstrated last fall when game after game resulted in a Queen's defeat; yet in every contest the team never stopped trying and the rest of the student body backed them all the way.

After four successful seasons, the inevitable cycle had arrived and the losses in personnel were too many to replace.

Those who filled the gaps lacked nothing in desire, but inexperience and weight disadvantage made too great an obstacle to overcome.

It's easy to ride with a winner; you stuck with a losing cause. We're proud of you.

THE SEASON

OCTOBER 5, 1957

VARSITY (16)

AT QUEEN'S (8)

WITH a win and a loss in two exhibition games behind them, the 1957 version of the Golden Gaels opened their quest for a third straight Yates Cup. The capacity crowd was denied a Queen's victory, but it was not through lack of effort on the part of the team. Although inexperienced and outweighed by their opponents, the Gaels put up a terrific fight. Ron Stewart's thirty-first touchdown of his college career and "Jocko" Thompson's two points accounted for the Queen's scoring.

The Yates Cup began to fade from view following the Gaels' second straight defeat. Although there was hope for the Queen's fans until the second half, the vaunted Western passing attack soon overcame the visitors. Karl Quinn and "Chuck" Safrance stood out in the backfield with Mitch Wasik and Terry Steinberg playing a steady game along the line. Ron Stewart contributed a brilliant two-way game.

**QUEEN'S (6)
AT MCGILL (33)**

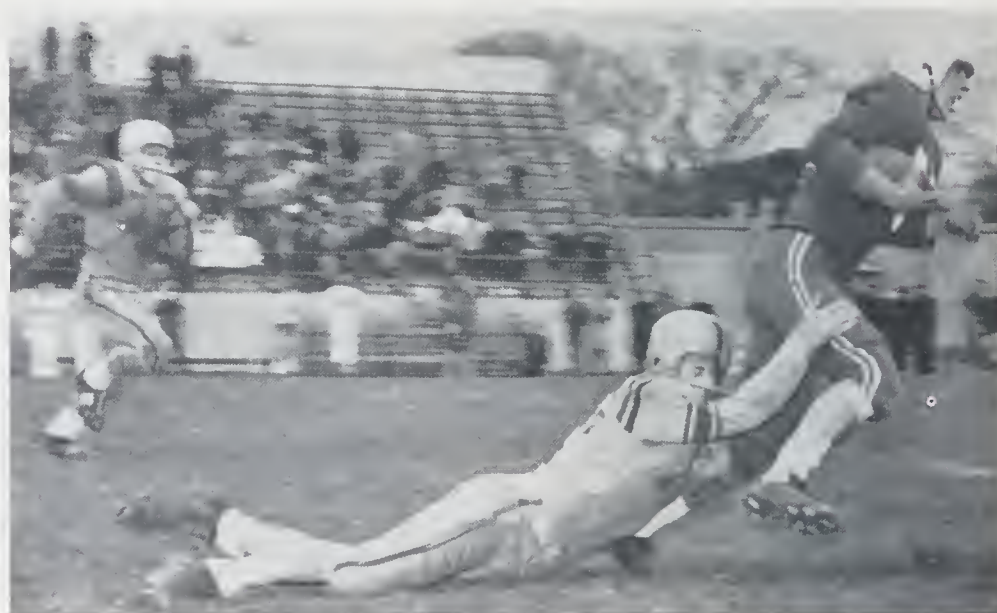

Led by their great passing quarterback, Dick Carr, the strong McGill Redmen subjected Queen's to the "Massacre in the Molson Mud" on a rainy Saturday afternoon. The Gaels seldom threatened throughout the game, losing the ball often on fumbles and pass interceptions. The only Queen's touchdown came on a pass from Bob Campbell to Paul Fedor.

NOVEMBER 2, 1957

WESTERN (21)

AT QUEEN'S (8)

In the last game of the year from the Queen's point of view, the Gaels went down to a 21-8 defeat at the hands of the Western Mustangs. Trailing by only 7 - 1 by half-time, the team surprised everyone by coming within two touchdowns of the team that went on to win the Yates trophy. Ron Stewart played his best offensive game of the year but it was hard to single out any one player as the star of a fine team effort.

The first snowstorm of the year failed to dampen the enthusiasm of the large number of Queen's students on hand at Varsity Stadium to witness the Gaels' last game of the year. With a 2 - 0 lead early in the third quarter the team seemed headed for an upset but a strong Toronto comeback thwarted these hopes. Ron Stewart, later voted the league's Most Valuable Player, failed to establish a new team scoring record.

Front: G. ROBINSON.

QUEEN'S COMETS

THE Tricolor Intermediate Football Team of 1957 finished third in the league standings to Toronto and Western, with Ryerson Tech in the cellar, as the Comets completed a home and home six game schedule in the Intermediate Intercollegiate football loop.

Unlike the senior Gaels, the intermediates managed to win two games — both against Ryerson Tech 12 - 6 and 9 - 1. Toronto Baby Blues, the undefeated league champions, won 20 - 9 and 19 - 9, while the Western Colts triumphed 34 - 13 and 34 - 22.

The '57 edition of the junior Gaels consisted of a large representation from the freshman year together with some stalwart veterans from last year's team. Into the Tricolor limelight comes Terry Porter whose all round performance will surely advance him to the senior ranks next year. Gord Simester played sterling football as did Bert Winnett, Dean Kemp and Dick Pearce — all freshmen backfielders. Fleetfooted Ray Hermiston and Jon Scoates stand out as running backs throughout the season, while Bryan McKelvey, Kent Plumley and Gord Nicholls were among the key defensive players. On the line, Awrey, Barry Taylor, Gord Dougall, Al Pargelen and Mike Woolgar were towers of strength. Pass-receiving artist Warren Campbell accompanied by Don Plumley and Gord Robinson fortified the end line positions. The quarterback slot was in the capable hands of Jim Biggor and Dave Bradley.

The opening game at Varsity Stadium featured a 9 - 7 lead for the aggressive Comets at the end of the third quarter by virtue of a 68 yard touchdown gallop by Hermiston and Porter's rouges. However, a weakening in the second half was a characteristic pattern in practically every game and proved disastrous as the Blues capitalized on an intercepted pass and a fumble for two majors. The final score 20 - 9.

The second game was Western at Queen's. The passing combination of Bradley to Campbell accounted for one touchdown and a short goal line plunge by Scoates after a 75 yard downfield march gave the Gaels a creditable 13 points as the Colts led 14 - 13 at half-time. However, the purple and white by virtue of five intercepted passes went on to win 34 - 13.

At Queen's the next Saturday it was a different story. The Ryerson Rams faced a determined Tricolor team — bitter from the wounds of defeat. The kicking toe of Porter along with a two yard touchdown plunge by Pearce gave the Comets an 11 - 0 first quarter margin. They maintained the lead and emerged victorious by a 12 - 6 count for their initial win.

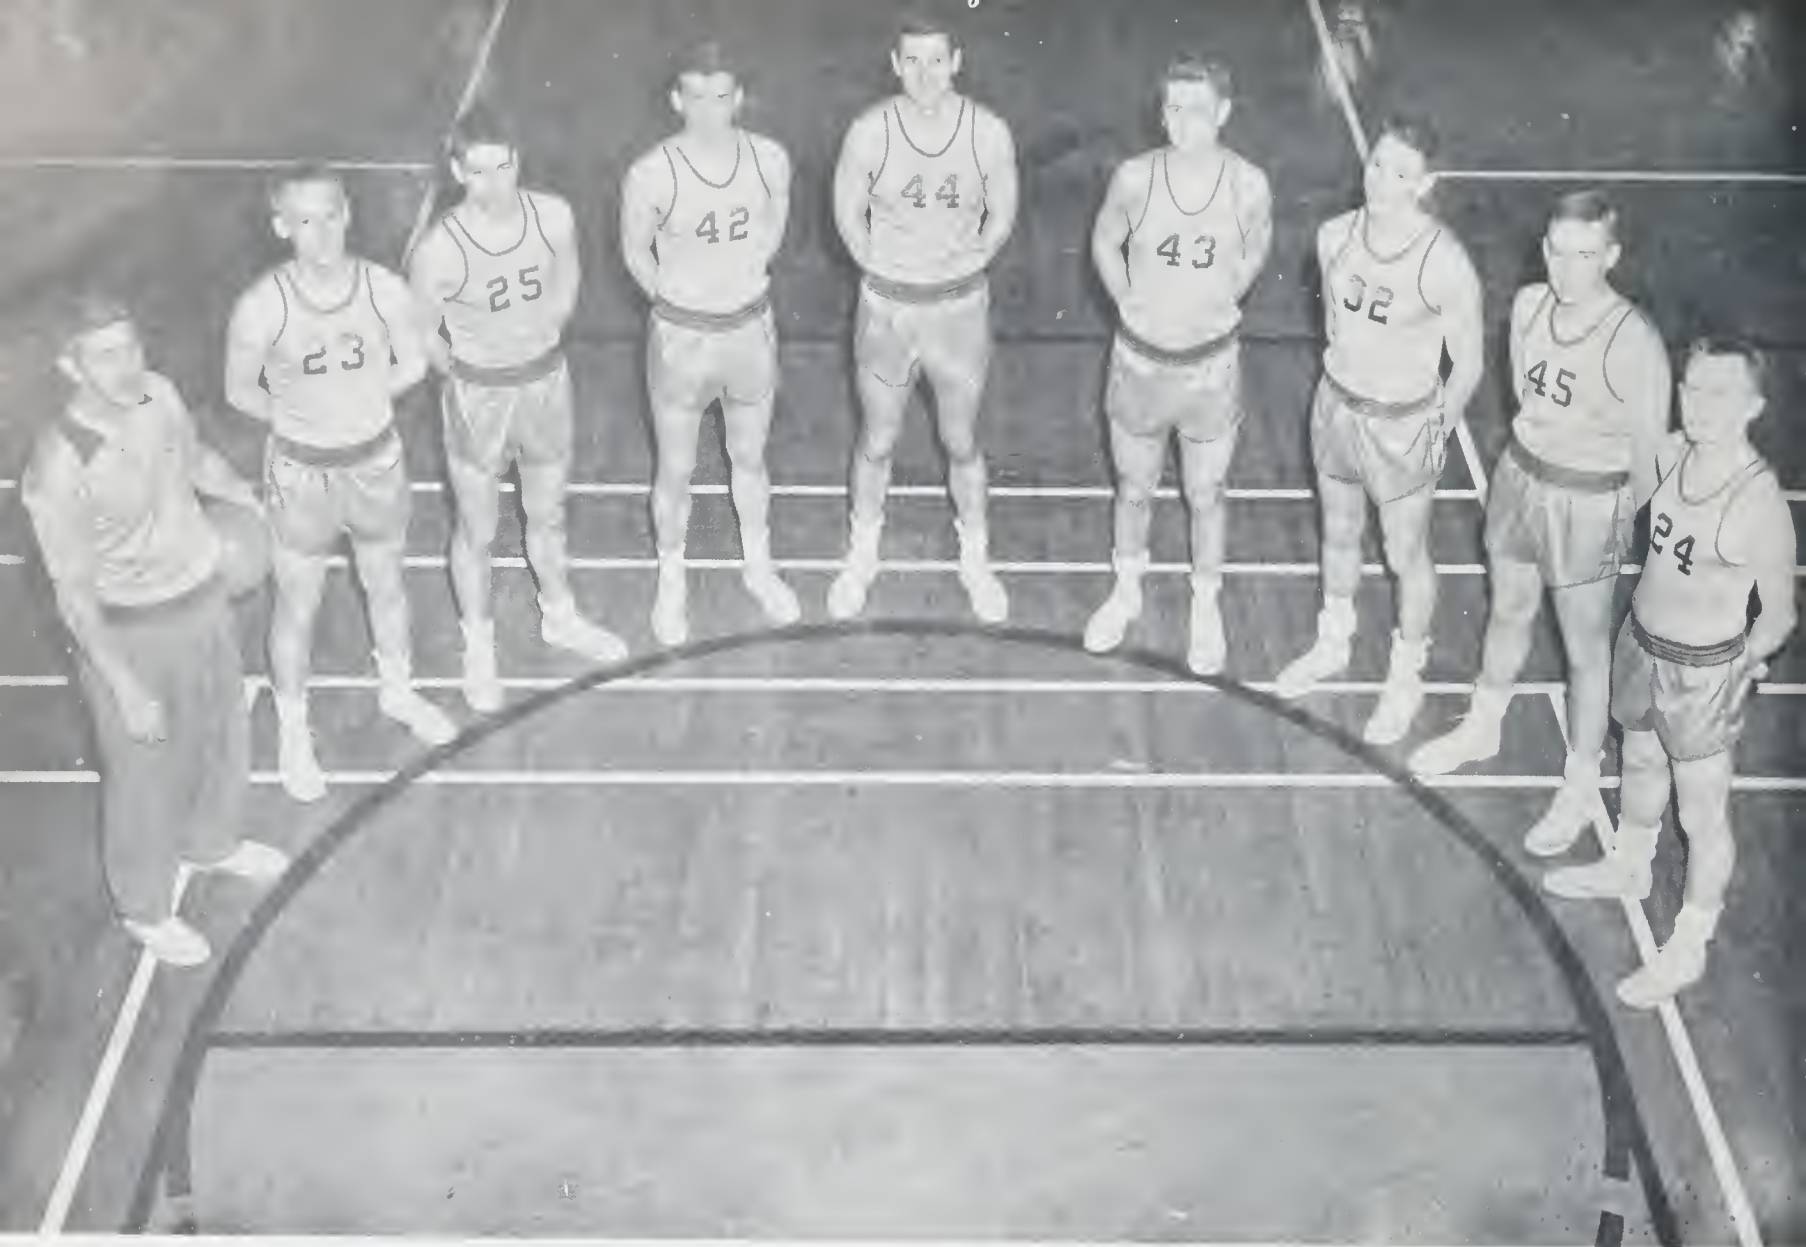

At East York Stadium the same two teams met the following week-end with Ryerson seething for revenge and Queen's seeking their second victory. A fumble recovery by Pargelen, which resulted in a touchdown, led the way for a 9 - 1 Tricolor win.

At Western, in the fifth game, a fumble and an intercepted pass were again vital factors in a 21 - 1 half-time score as the Colts stampeded the hapless Tricolor. However, the stubborn Gaels fought back as Simester, intercepting a Western pass and galloping 75 yards for a touchdown, spirited his team to a commendable effort in a 34 - 22 losing cause.

In the last game of the campaign Queen's played host to the Toronto Baby Blues as mud and rain were the order of the afternoon. Two Tricolor fumbles in the first quarter gave Varsity a 12 - 0 first quarter lead. Bradley went to the air and directed a 70 yard march which resulted only in a rouge. The Baby Blues were too powerful on the ground and although the spirit of the Gaels was willing — the flesh was weak. Toronto left the muddy gridiron with a 19 - 9 victory and the championship.

The season's performance was a creditable showing for the Comets as the scores indicated and at no time were the gallant Gaels outclassed.

To coaches "Jake" Edwards and Keith Harris goes a vote of "thanks" from every member of the Comets of '57.

F. TINDALL (Coach), J. SILTALA, G. TURNBULL, J. HARRISON, J. MACMAHON, G. STONE, B. BREITHAAPT,
D. BOZIC, A. WARREN.

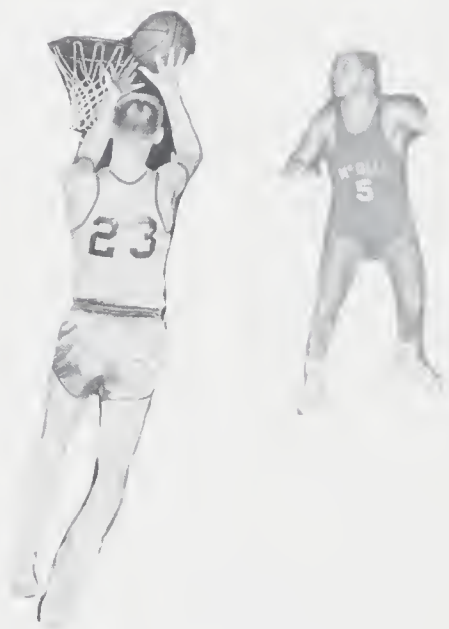

4 UP

THE 1957-58 Queen's Senior Basketball team finished in third place with four wins and six losses.

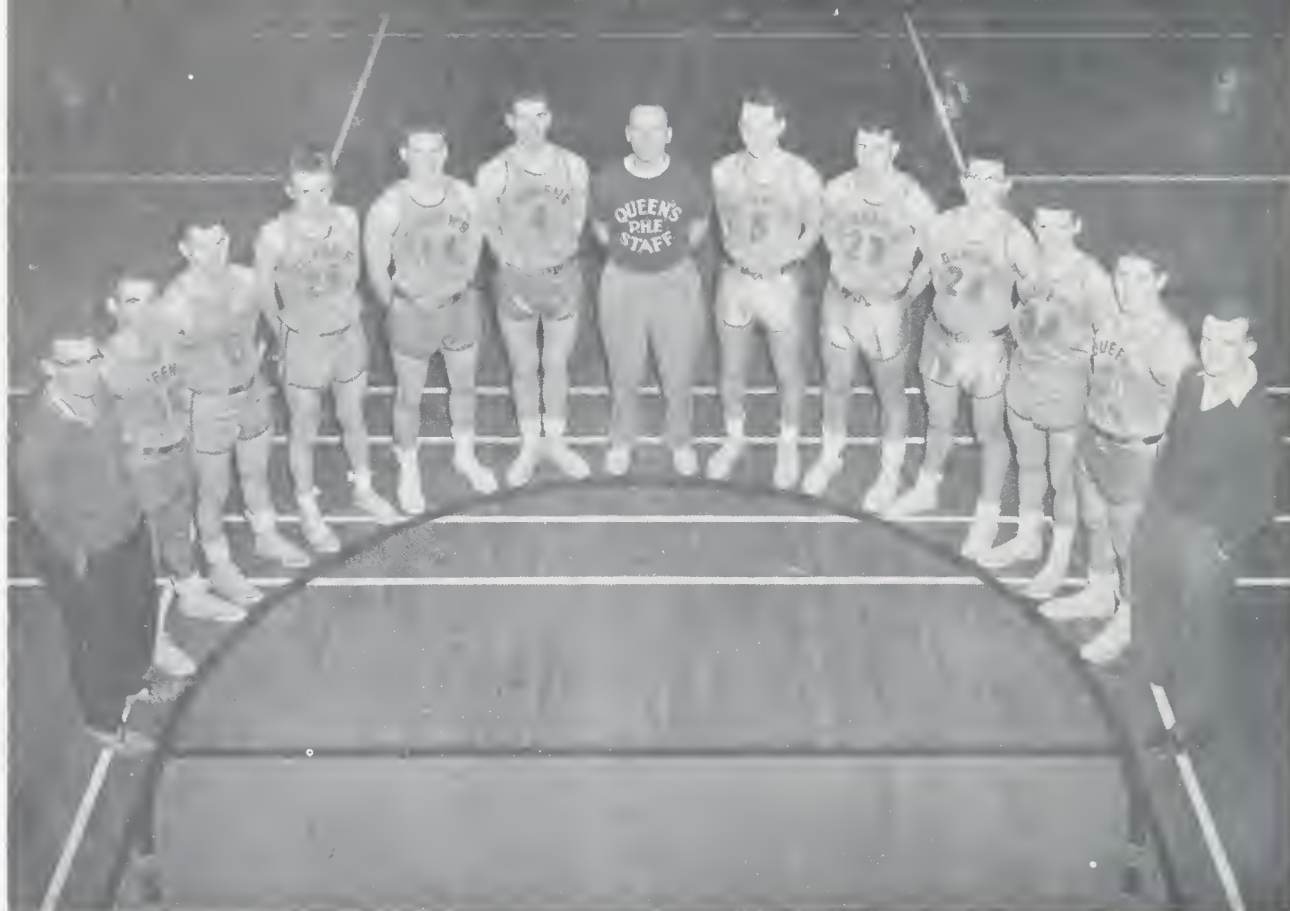

Greg Stone was voted the most valuable player by the team. He led the team in total points with 130. He also led the team in rebounds. Captain Jim Harrison was second in total points with 107 and second in rebounds with 61. The team's best shooter in percentage was Jim Siltala who shot 33% on field goals and 77% on free throws. Bob Evans was the team's leading scorer for the first four games and the team was sorry to see him leave school. In the four games he played, he averaged 18 points per game. Jay McMahon who played only the home games was very effective in

. . . 6 DOWN

grabbing rebounds and was missed by the team on the away-games. Denny Bozic helped to fill the opening left by McMahon on the away-games and did a very fine job. Gus Turnbull who was voted next year's captain thrilled the spectators with his remarkable drive-in layups. Murray Prior, Art Warren, and Bob Breithaupt, although used sparingly, were effective when they played. The team massed a total of 608 points in ten games with a record of 4 wins and 6 losses. It shot 36% on field goals and 58% on free throws. Coach Frank Tindall is to be congratulated for his fine work throughout the year. With luck, we'll have the championship back at Queen's next year.

L. DOLIN (Mgr.), G. BERNHARDT, J. MOODIE, W. FLEMINGTON, B. BURLEIGH, B. ANGLIN, A. LENARD (Coach), B. JOHNSON, F. HAWKINS, J. PANDO, C. MORRISON, T. MATTOLI, W. CAMPBELL (Mgr.)

INTERMEDIATE BASKETBALL

FOLLOWING exhibition defeats at the hands of three American colleges and victories over R.M.C. and Watertown, the Queen's Jayvees opened the 1958 season against Toronto in the Queen's gymnasium. Although the visitor triumphed 68-65, hopes were high that at least a third place finish would be achieved.

The first road games came on the 17th and 18th of January. After losing 77-57 to Toronto the team broke into the win column with a 68-60 win over McMaster. The following week-end saw the Jayvees whip the McGill Indians 53-40.

Assumption Crusaders handed the Jayvees their third defeat 80-73 in the Queen's gym to halt the team's winning streak before Queen's bounced back to outscore McMaster 89-86 in the highest scoring game of the season. The next week-end the

home-town crowd saw the intermediates upset the Western Colts 73-66 in a well played and exciting game.

A two-game week-end resulted in two losses for the Jayvees, as Assumption's 82-67 victory followed Western's 81-41 triumph. An even number of victories and defeats was achieved the following week however, when Queen's defeated McGill 54-36. With 5 victories and 5 defeats the team finished the season in a third place tie with Western behind Toronto and Assumption.

Murray Prior, who also played for the Senior Gaels, Bill Anglin, and Jim Pando were the high scorers for the Jayvees for the season. With the return of a good number of this year's team the Jayvees of 1958 will be in the running all the way for the league title.

JIM EICKMEIER, KEITH ARMSTRONG, ROBIN MACKAY, BAYNE PERRIN, TOM GRAHAM.

BADMINTON

THE intercollegiate badminton championships were held this year in Montreal on January 31. The Queen's team, captained by Bayne Perrin,

took part in the tournament which was won by the University of Toronto. Games were also played with various local teams throughout the year.

SKIING

COMPETITIVE highlights for the 1958 edition of the Queen's Ski Team were the Ontario-Quebec Conference Meet at Lac Beauport and the Ottawa-St. Lawrence Invitation Meet at Camp Fortune, Ottawa.

In the former, the Tricolor finished fifth and the best result individually was produced by Chris Nowakowski, who finished a close third in the four-way combined skimeister event. Jim Jackson jumped extremely well to finish fourth, while

Lawlor Rochester ran a very good cross-country race to end up in fifth place. Queen's was fairly close to the team leaders in the down-hill, led by Grant Gibson, but in the slalom, terrain and length of course proved too tough for our skiers.

At the Camp Fortune Meet, we fielded only half a team, yet nearly retained the trophy, but St. Lawrence U. of Canton, N.Y., finally trimmed us. Rochester won both the downhill race and the cross-country event to lead the Gaels.

From L. to R.: JAKE EDWARDS (Coach), GRANT GIBSON, CHRIS NOWAKOWSKI, LAWLOR ROCHESTER, ROSS DOBBIN, JIM JACKSON.

Absent: LEON BUSKARD.

Back Row: GORD SAVOY (Mgt.), DARYL MCKENZIE, WILF KANGAS, BOB HAWKINS, LARRY STODDART, BARRY PERCIVAL, DAVE SKEENE, JACK CORBETT, BOB McALEESE, MURRAY HAMPTON, STU LANGDON (Trainer).

Front Row: CARL NURMI, GARY EDE, JIM SHEARN, BOB PARR, KEITH "MOON" FLANNIGAN (Coach), BRYCE SANDERSON, PETE GROSSI, ANDY BAKOGEORGE.

INTERCOLLEGIATE HOCKEY

THIS season the Gaels took a step in the right direction in their quest for re-entry in the Senior Intercollegiate Hockey League, by being included in a new six team loop, comprised also of teams from McMaster, Waterloo College, Osgoode Hall, Ryerson and O.A.C. This loop was tagged with various names, from Intermediate Intercollegiate to Central Ontario Hockey Association.

The Queen's squad finished a close second to O.A.C., only because Lady Luck chose to smile more favourably on the Guelph sextet. In a home and home series, the Gael puckmen lost 4-3, and 3-2 squeakers that could have gone either way. They defeated McMaster 16-1 in a four pointer at home, outscored Waterloo 7-0 and 6-4, defeated Ryerson 7-2 and were held to a 1-1 tie, and defeated Osgoode Hall 7-4 and were held to a 3-3 tie.

Across the border the Gaels bowed to both St. Lawrence and Clarkson by scores of 7-1 and 5-4 respectively.

The Gaels also lost a pre-Christmas exhibition tilt to McGill's Senior Intercollegiate Redmen 4-2. But their strong showing in this game will go far in helping to push Queen's back into senior Intercollegiate play come the fall of 1958.

Congratulations must go to rookie goaltender Bob Parr who was voted Most Valuable Player by his team mates, and to coach Keith "Moon" Flannigan whose undying efforts may produce a senior Intercollegiate team come the 1958-59 season.

WRESTLING

WATER POLO

SENIOR water polo was in a ticklish position this year. The Athletic Board of Control declared the team "unorganized" and the Intramural Athletic Council ruled that the players were ineligible.

The team played McGill and Toronto in the fall term and lost to both teams through lack of experience. Against R.M.C. in the spring, the team was victorious.

Next year the team hopes to see themselves "organized" and in a newly formed intercollegiate league.

Front Row: A. ROSENBERG, G. ROBINSON (Capt.), N. DIAMENT.

Back Row: D. MAY, J. SOWTAR, F. MAINE, A. SCHWARTZ, D. VAN REALTE, R. BROUGHTON.

Absent: D. SINCLAIR, H. CLARKSON, P. NICHOLSON, G. LIESMER, G. STECKO.

Back Row: P. VINDASIUS, A. HYLAND, M. WOOLGAR, D. SAEGER, H. WOOD, M. MCLEOD, J. JARVIS (Coach).

Front Row: H. COURTNEY, E. SCHAMERHORN, K. PRIDE, G. LEGER, T. O'BRIEN.

BOXING

THE Queen's boxing team tied with McGill for runner-up in the intercollegiate boxing championships at Toronto. Toby O'Brien (145 lbs.) and Al Hyland (175 lbs.) won championships for the

Tricolor with Henry Courtney (130 lbs.), Ken Price (135 lbs.) and Ed. Schamerhorn (165 lbs.) all reaching the finals. Congratulations to all the boys for a highly creditable showing.

WRESTLING

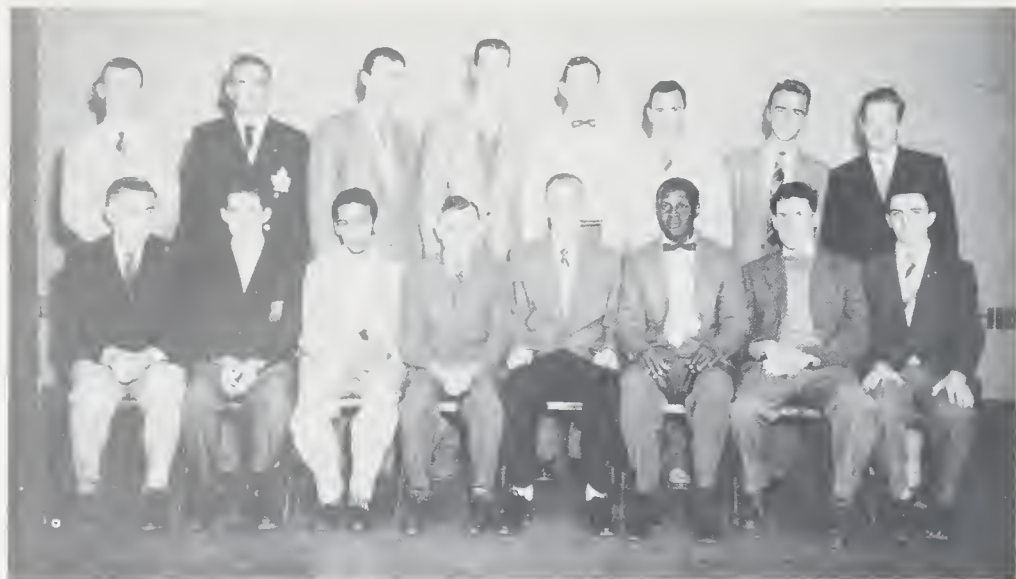

THE Queen's wrestling team travelled to McGill on February 28 for the intercollegiate championship. The nine man team, ably coached by Fred Siemonsen, trained long and hard

throughout the year and although they failed to win any championships, are to be congratulated for their fine performance.

Back Row: J. PLUMMER (167 lbs.), B. MOSS (177 lbs.), H. ALLEN (191 lbs.), J. GREGG (Heavy), F. SIEMONDSON (Coach).

Front Row: J. UNDERWOOD (Mgr.), D. SANDERSON (157 lbs.), K. ESSELTINE (147 lbs.), P. CLARKE (130 lbs.), K. CHANG (123 lbs.).
Absent: D. COCKFIELD (137 lbs.).

Back Row: R. KOTASH, E. VARGA, B. JOHNSON, J. HAYES, J. FRAZER, R. MORRISON, D. PORTER, R. CROFT.

Front Row: G. MENARY, D. AWANG, R. ZORIGHT (Coach), S. HODKINSON, A. HYLAND, I. MAYCOCK, R. BUCHANAN.

TRACK

ON a dull, soggy October 25th at Toronto's Varsity Stadium, the Queen's track and field team garnered fourth place in the annual intercollegiate meet. Captain Spence Hodgkinson, top point-getter for the team with a first and a second, Ian Maycock and Dick Pearce were the Queen's stars.

In the same meet the intermediates, paced by

the performances of Dave Porter and Bob Kostash, also finished fourth.

On November 9th, the Harrier team, sparked by a second place finish by Ian Maycock and a fourth by Dave Porter, finished second to Toronto. Jim Frazer, Bob Buchan and Jack Hayes also took part in the meet.

GOLF

NORM Thompson, Dave Norman, Jim Petropoulos, Mac Killaly comprised this year's Queen's Intercollegiate Golf Team. The team placed second in the Intercollegiate playoff this year and Norm. Thompson finished in a tie for the individual honours. The team also journeyed to Syracuse to play a match with Syracuse U. and lost by only

one point with Jim Petropoulos leading the way in the individual honours. Mac Killaly and Dave Norman finished in the top 8 in the Intercollegiate. With the entire team returning next year the boys are looking forward to bringing back the Intercollegiate Golf Crown to Queen's to stay.

WOMEN'S ATHLETICS

LEVANA ATHLETIC BOARD OF CONTROL

Back Row: S. VINCENT, D. McLAUGHLIN, M. GLOVER, Miss ROSS, Miss TURNBULL, J. THOMPSON, M. McKINNEY.

Front Row: B. BELL, S. REYNOLDS, J. CHAMBERLAIN, J. REID, D. PALMASON, J. HANNA, M. RAPAWY.

Absent: M. McCULLOCH, Miss LEGGETT.

ANOTHER year has gone by in the sports life at Queen's, leaving behind its fair share of wins and losses, disappointments and surprises. The Golden Gals have secured several championships in both individual and team events, and to the winners go the congratulations of all who have been following their activities. Competition was keen, and the benefits derived from it have been numerous.

The Intramural program has again been very successful, drawing in large numbers of participants. The tournaments were well organized and spirits ran high in the trophy race. A vote of thanks goes to the hard working representatives who carried out the busy schedules.

A number of improvements have been made — in the program itself, in the equipment available, and in the reporting and recording of our activities. We are grateful to our faculty advisors for helping us in all these endeavours.

We have enjoyed taking part in the athletic program — as organizers, participants and spectators. May you continue with the vigor, enthusiasm and good sportsmanship which you have shown this year.

Judy Reid

INTERCOLLEGIATE COACHES

MISS MARION ROSS, B.A., M.A.

Miss Ross was the coach of our championship Archery team this year.

A VERY happy example of student government at Queen's is the Levana Athletic Board of Control. The students who have been elected to this Board, with the help of faculty advisors, plan and carry out the entire athletic program for women students. Each year the new Board accepts the challenge of its responsibility and takes a broad view of the purpose and scope of the intercollegiate and intramural programs. I have been proud in the past of the maturity of judgment that has been evident and the many wise decisions that have been made.

It has always been a pleasure to work with the members of the Board and I look forward to the further growth and accomplishment that will inevitably result from this democratic system.

Marion Ross

MISS DOROTHY LEGETT, B.SC., M.S.C

Miss Legett coached Queen's Inter-collegiate swimming and volleyball teams.

MISS ANNE TURNBULL, B.SC. (Phys. Ed.)

Miss Turnbull looked after the basketball, tennis and badminton teams.

INTERCOLLEGIATE TEAMS

ARCHERY CHAMPIONS

BETSY THORNTON, MARG. GLOVER,
DOROTHY McLAUGHLIN, GEORGIA COPLAND.

DOROTHY
McLAUGHLIN

GEORGIA
COPLAND

MARG. GLOVER

QUEEN'S Archery team broke a losing streak of four years when they brought back to the Alma Mater the Women's Intercollegiate Championship. The tournament was held at McGill, the home of the defending champions, the week-end of Oct. 26, 1957.

In their victory the Queen's girls broke many long-standing records. Their total was the highest ever recorded in intercollegiate archery. Marg. Glover set the highest singles score with 516 points. The previous high singles score was 474. Dorothy McLaughlin teamed with Marg. to set another record, each girl scoring six successive bullseyes which constituted a perfect end. Other members of the team, which was coached by Miss Ross, were Georgia Copland and Betsy Thornton.

There were two rounds, one in the morning, the other in the afternoon. Queen's morning score of 1686 broke yet another record.

McGill placed second in the tournament with a grand total of 3086, 96 points behind Queen's total of 3182. The other competing teams in order of finish were McMaster, Toronto, O.A.C. and Western.

BETSY THORNTON

TENNIS

Back Row: S. JOYCE, MISS TURNBULL
(Coach), A. THATCHER.
Front Row: S. VINCENT, I. HANNA.

QUEEN'S girls were the hostesses for the Intercollegiate Tennis Tournament held last fall at Queen's, October 18 and 19.

The tournament weather was anything but ideal as rain and cool temperatures hampered the play. This did not discourage the Toronto girls, however, who won 11 out of their 12 matches. Western and McGill tied for second, McMaster and Queen's finished fourth and fifth.

Sylvia Joyce was the sole winner for Queen's defeating the singles player from McMaster. The girls did get some very good coaching so — maybe next year.

SWIMMING

Back Row: J. REID, E. MOXON, L. ANGLIN, D. McLAUGHLIN, M. GLOVER.

Front Row: J. ELLIOTT, M. McCULLOCH, S. GRAHAM, N. ELLIOTT.

Absent: P. BEATTIE.

THE swimming meet was held this year in the Hart House pool at U. of T., November 23rd. Western once again took home the championship but this time with some difficulty. McGill ended a close second behind Western with Queen's and Toronto tied for third position.

Nan and Jan Elliott won top honours for Queen's with a first in their synchronized doubles, fittingly called "Cat Spat." Judy Reid placed second in the synchronized solo class as well as in the backstroke race. Seconds were also won by the Medley relay team of Peggy Beattie, Judy Reid and Dorothy McLaughlin. Mickey McCulloch placed third in the Individual Medley as did Queen's free-style relay team of Sandy Graham, Elspeth Moxon, Lois Anglin and Dorothy McLaughlin.

VOLLEYBALL

UNIVERSITY of Western Ontario was host this year to the Inter-collegiate Volleyball tournament held Feb. 7th and 8th. Six teams were entered with Western coming out on top with Queen's a close second. McMaster and U. of T. tied for third with McGill and O.A.C. placing fifth and sixth.

The games which the Queen's Gals won, they did quite easily as indicated by their scores, 37 - 21, 44 - 28, 51 - 8, 29 - 19. Western was the only team to defeat the Golden Gals.

In their exhibition games held at Queen's before the tournament, the Queen's team defeated McGill but lost to Western. Queen's will only lose two girls through graduation this spring. Thus maybe next

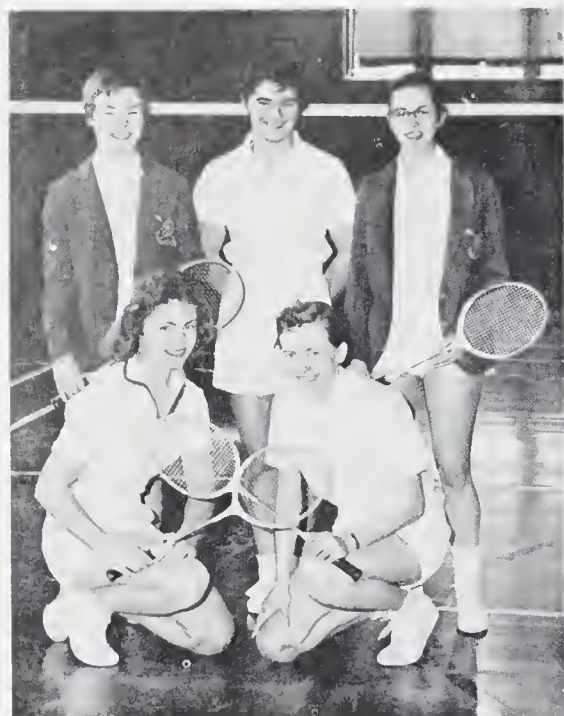

Back Row: C. WHETHAM, S. REYNOLDS, J. ATWOOD, S. FINSTAD, M. McCULLOCH, Miss LEGGETT, Coach.

Front Row: S. HOUGH, J. FENWICK, M. PAGE, G. HOWES, Captain. M. KEDDIE, M. SCHRADER.

Absent: J. McCREERY.

year they will be able to overtake Western to win the Championship.

BADMINTON

Back Row: S. HOUGH, MISS TURNBULL (Coach), J. FENWICK.

Front Row: S. JOYCE, D. McLAUGHLIN.

VARSAITY'S five year reign as Women's Intercollegiate Badminton champions, ended when Queen's Dorothy McLaughlin and Sue Hough won the championship in Toronto February 15th. The twosome lost only one game throughout the tournament when they were defeated by McGill.

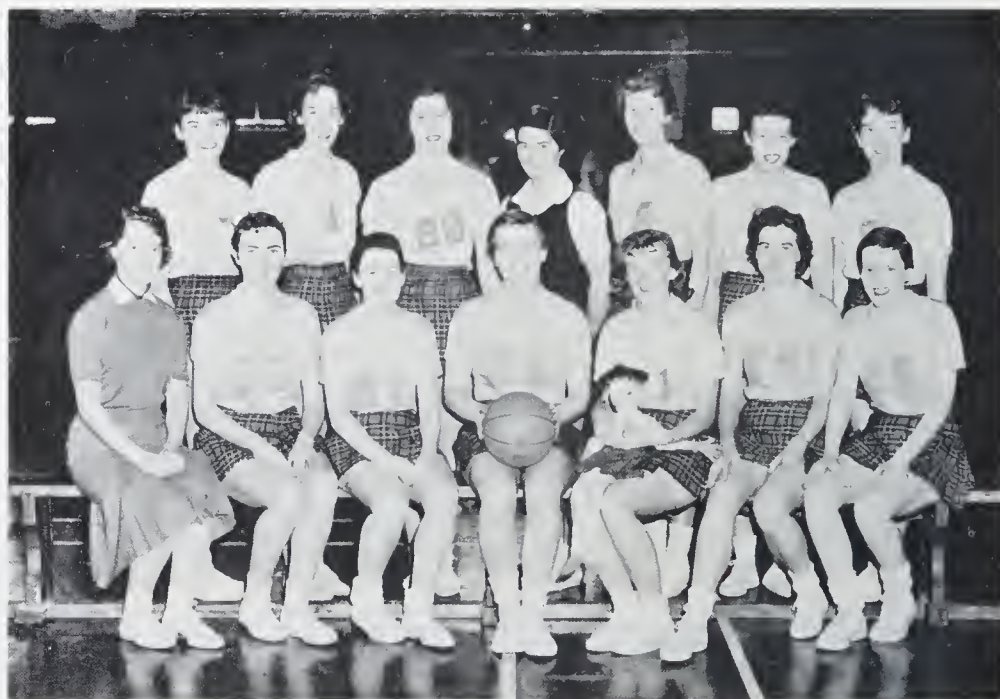

In the first singles, Sylvia Joyce lost her match with Toronto but easily defeated the other teams from McGill, Western, O.A.C. and McMaster. Queen's second singles, Joan Fenwick did likewise as she also lost her match with Toronto.

The doubles victory was not enough for Queen's to capture the total team standing. However, Queen's did place a close second behind Toronto with 13 points to 14 for Toronto. McGill placed third with 8 points while Western and O.A.C. placed fourth and fifth. Congratulations, Gals.

BASKETBALL

THE Women's Intercollegiate Basketball tournament was held at McGill, February 28 and March 1. Queen's Golden Gals met defeat at the hands of Western Friday night when the team from London defeated the Gals 45-28. The Queen's team was held to a standstill by the guarding of the Western girls. Half of Queen's points were scored on free throws.

Saturday, in the consolation game, Queen's defeated McGill by a score of 50-32. Barb Bell was the high scorer with 15 points. In the championship game, Western defeated Toronto, the defending champions 39-30 in by far the best game of the series. Thus for the coming year the Bronze Baby will reside in London. Perhaps next year we will be successful in bringing it to Queen's.

Winners of L.A.B. of C. Plaques

The L.A.B. of C. gives a plaque to any girl who is a member of an intercollegiate championship team or who wins a championship in an individual event in intercollegiate competition. The following are the winners for '57-'58:

ARCHERY CHAMPIONS:

Georgia Copland
Margaret Glover
Dorothy McLaughlin
Betsy Thornton

BADMINTON CHAMPIONS:

Sue Hough
Dorothy McLaughlin

SWIMMING CHAMPIONS:

Jan Elliott
Nan Elliott

Les Girls

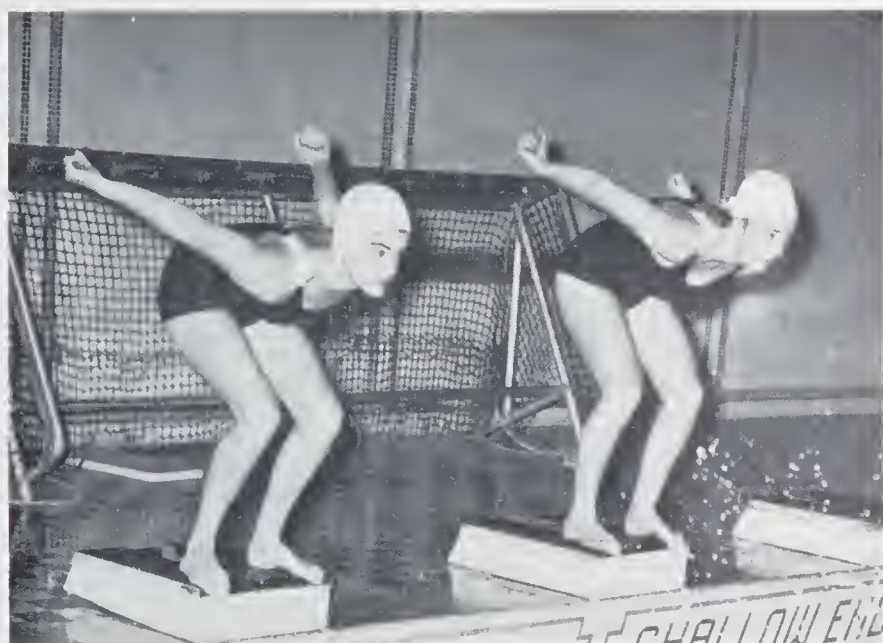

Thought I'd miss, eh?

New Intercollegiate sport?

Up she goes!

And they're off!

Put it here, Ike.

Up and away.

Let's get together on this.

Student Activities

TRICOLOR SOCIETY

ADMISSION to the Tricolor Society shall be regarded as the highest tribute that can be paid a student for valuable service to the University in non-athletic, extra-curricular activities.

Admission to the Tricolor Society shall be limited to post-graduates, and to students in the second term of their final year, who, maintaining a satisfactory academic standing during their undergraduate course, have rendered valuable service to the University in non-athletic, extra-curricular activities, namely the major offices of student government, journalistic work, debating, dramatics and to such other students as they may, by unanimous decree of a special committee appointed for this specific purpose, be recommended for admission to the TRICOLOR SOCIETY.

These are the people who have been selected as members of the Tricolor Society in 1958:

HERB HARMER

President A.M.S. . . . Engineering Jr. and Sr. A.M.S.
Rep. . . . Athletic Stick, Chief Vigilante, Vice-Pres.
Science '58 . . . President, Permanent Exec. Science '58.

ANNE HAYES

Levana Jr. and Sr. A.M.S. Rep. . . . Chairman, External
Affairs and Hungarian Student Aid Committees . . .
House Council . . . W.U.S. . . . Arts-Levana Comm.
. . . Drama Guild.

BOB LITTLE

Vice-Pres. A.M.S. . . . Chairman Budget and Finance,
Student-Faculty, and Orientation Week-end Committees
. . . Arts Jr. and Sr. A.M.S. Rep. and Secretary . . .
President Arts '58 . . . Liberal Club . . . Interfaculty
Debating . . . Model Parliament.

ROSS MORTON

Chairman Union House Committee . . . Union Council
. . . Co-Editor Who's Where . . . Chief of Police A.M.S.
. . . Pres. Meds '59 . . . Aesculapian Society executive
. . . Internship and Building Fund Committees . . .
Tricolor . . . Convener Annual Medical Dinner.

ANDY WONG

Aesculapian Jr. and Sr. A.M.S. Rep. . . . Chairman
F.R.O.S., Matheson Fund and Welcoming Committees
. . . Meds '59 executive . . . Internship Committee . . .
Originator and Program Director, D. C. Matheson
Testimonial Dinner . . . Historian, Medical House . . .
U.N.T.D.

TRICOLOR '58

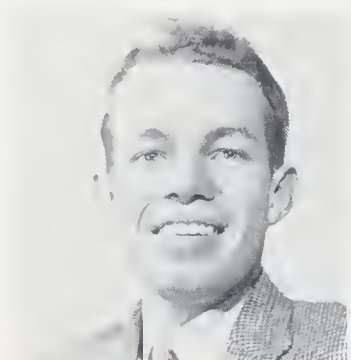

PATRICIA SWITZER
Editor

THE production of any Tricolor yearbook begins with the raw materials of a dozen people with varied talents and conflicting ideas; fifteen more people, willing to help with "just anything" who end up doing "just everything"; and an editor with high hopes and a few ideas. These people are thrown together for six extremely short months in two extremely small offices with three extremely important deadlines hanging over their heads. Out of this environment came Tricolor '58.

The yearbook's guiding light and true genius (also fill-in) was Angus the Scotsman. He led Tricolor through '58 as the staff recaptured the bright spots, the blue spots, and the plain, ordinary, dull spots of campus life.

Angus and the editor can only say "Thank'ee good people" to the Tricolor staff, and "Hoot mon, enjoy yourselves" to the Tricolor readers.

Patricia Switzer.

QUEEN'S JOURNAL

HERSCHEL HARDIN
Editor

STRUGGLING through the flood of letters to the editor in our offices, we on the Journal staff once more find ourselves with nothing to do at Queen's except to study. And this is dull fare indeed compared to the gales of controversy in which the paper has been embroiled during this past year.

Now that the fires have died down, and editorial issues, which at one time seemed crucial, are put in proper perspective, we are just beginning to realize the value of debate and argument on a university campus. The Journal editorial staff enjoyed being in the middle of it, and feel they were given a special opportunity to observe undergraduate human nature at work.

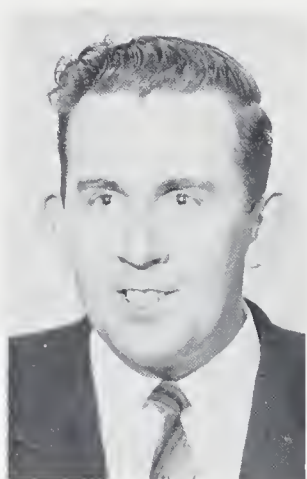

This year's staff, like all the Journal staffs before it, has shown loyalty to the paper that I doubt is matched by any other organization or club on the campus. Whether it be creating headlines in the wee hours of the morning, producing copy in emergencies, or standing up to criticisms which is inevitable with an outspoken paper, the staff has sent 38 editions to bed with a spirit and sense of humor that makes a hard job enjoyable. Much of the editorial work has been done by those without any previous editorial training, but who entered their work with gusto: from George, gurgling in the sports office, to Jake, sharpening his cynical knives, to those on the news staff who circled the "30" on the last news story of the night.

The more lively the pace and heated the controversy, the more we enjoyed and benefitted by our work. And those of us who are graduating realize, now the year is over, how valuable our work for the paper was to our undergraduate lives. To all those who made the Journal worth working for, from the harried editor to plugging reporter, may I say, thank you. Every class missed and hour of sleep lost in putting out the Journal was doubly worth its weight in printer's ink.

CONSEIL DES ARTS DES ETUDIANTS DES
UNIVERSITIES DU CANADA —
CANADIAN UNIVERSITY STUDENTS' ARTS
COMMITTEE

CUSAC Representatives:

DEBBIE BLAIR, '58-'59; PATRICIA PIDOUX,
'57-'58.

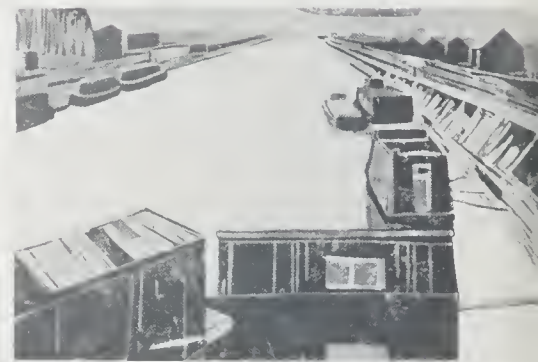

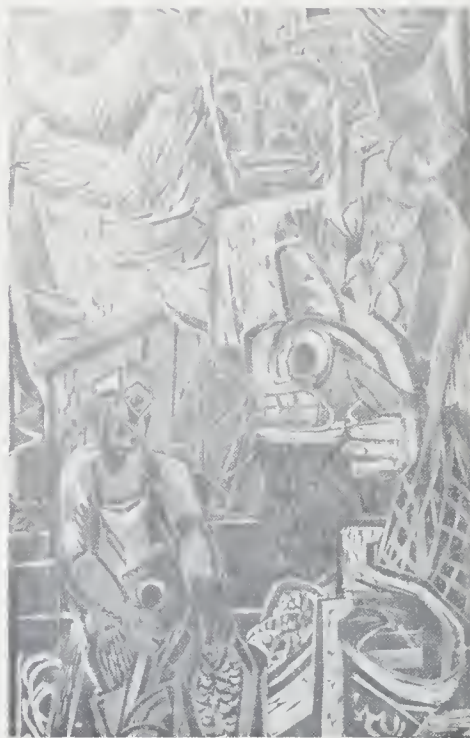

Patron: His Excellency the Right Honourable Vincent Massey, C.H., Governor General of Canada.

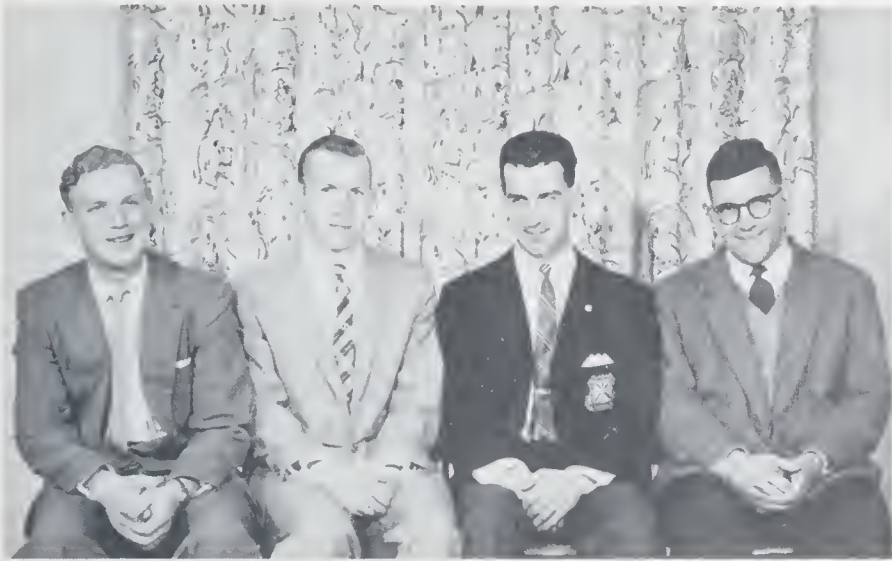

Honorary President: Mr. Alan Jarvis, Director of the National Gallery of Canada.

THE ambitious organization of CAEUC - CUSAC has now completed its first year at Queen's and ten other Canadian universities, from Mount Allison to the University of British Columbia. The purpose of the group is to promote interest in the arts at the university level: to encourage the participation of students in the choice, organization and circulation of cultural presentations and to stimulate exchanges of such presentations on the national, regional and local levels.

At the executive meetings in June, 1957, and February, 1958, discussions were held to decide how the aims of CAEUC - CUSAC might best be realized. With a desire to lay firm foundations for later activities, the group is, for the present, concentrating in the field of the visual arts. In sponsoring the exhibition, **Contemporary Canadian Prints**, which was gathered by university students, a high standard was set, and the show was well received from coast to coast. During the 1958-59 session, two exhibits will be sponsored: a collection of Canadian oil paintings, and a show entitled, **Young Canadian Drawings**.

Considering the progress that CAEUC - CUSAC has made in the short space of one year, this group has the potential to develop into a significant factor in the scene of Canadian arts.

Debating Society

Front Row: R. ABBOT, S. ROSS, H. CURRIE, P. COSGROVE.

Back Row: E. RABIN, N. ADAMS, P. HAYNES (Pres.), P. GALLOP.

THE QUEEN'S GLEE CLUB

THE QUEEN'S GLEE CLUB, under the musical direction of Dr. Graham George, is one of the oldest groups on the campus. It brings together, in an atmosphere of friendly joviality, students who are interested in group singing as a diversion from the rigours of study. Each year for the past few years, the Glee Club has presented an operetta, and, following the success of Gilbert and Sullivan's "Pirates of Penzance" in the 1956-57 season, "The Mikado" was presented in December of 1957.

THE QUEEN'S INTERFACULTY CHOIR

THE QUEEN'S INTERFACULTY CHOIR was formed in 1955 when it was felt that the Queen's Glee Club, which concentrates its efforts each year on an operetta or similar production, was neglecting a vast selection of good choral music. The Interfaculty Choir acts in a companion capacity.

The choir has sung the music of Bach, Beethoven, and Brahms, but has not neglected the modern composers such as Edward Elgar and Vaughan Williams. This year, the choir has also sung a group of folk songs and spirituals. The year's activities included the Christmas Carol Service and a combined concert with the Queen's Band.

The group is truly "Inter-faculty," including among its members students from each of the three faculties and Levana. The choice of music and the appointment of a choir director is left to the discretion of the executive which is elected each year. This year the choir was directed by Miss Edith Strahl of the Music Department of Sydenham High School.

THE QUEEN'S JAZZ SOCIETY

MAN, I'M TELLING YOU! The Q.J.S. has arrived. Those sounds coming from the Music Room every Tuesday were as far out as one can go. But could the cats with the ears agree? Man, those discussions were the most!

Well, these cats brought in a lot of strays from the outside world to give with the info., and even dug live sounds already.

It was kinda like the end, these jaunts to T.O. and Ottawa to catch the touring minstrel shows.

What grabs me is that these cats are serious yet, and even dig the long-haired sounds.

See you, Dad!

THE QUEEN'S BIOLOGICAL SOCIETY

THE OBJECTIVES OF QUEEN'S BIOLOGICAL SOCIETY are to promote interest in and discuss the developments and problems included under the broad field of Biology.

Bimonthly meetings throughout the academic year are open to staff members of the Biology Department and all interested students.

This year a field trip was arranged to Queen's Biological Station at Lake Opinicon. Speakers during the fall term included Dr. J. Z. Young from University College, London, who spoke on "Animal Behaviour" and Dr. P. H. James of the Psychology Department, who addressed the society on "Instincts."

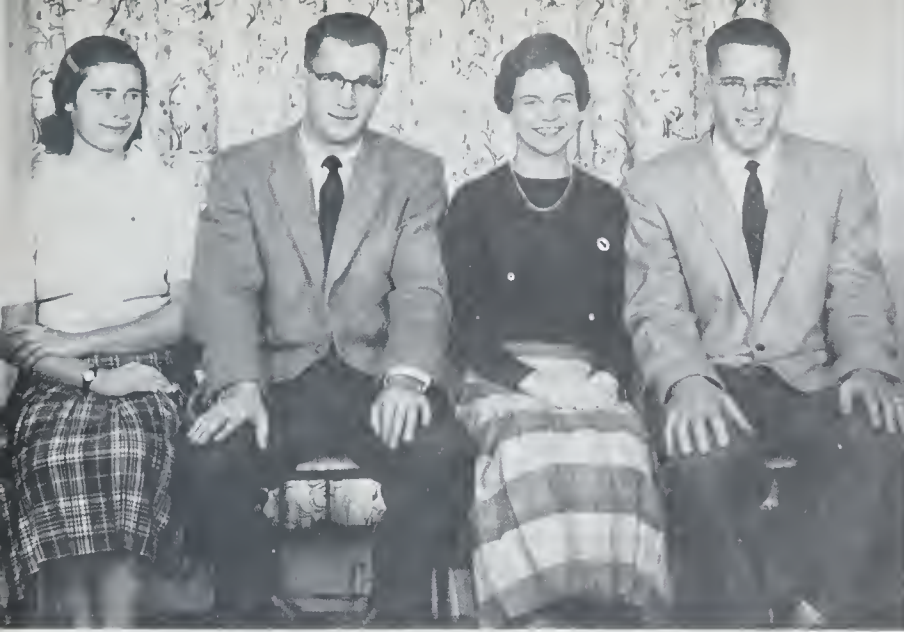

Student participant activities included the arrangement of botanical and zoological displays and various Open House projects. High school and public school students were taken on guided tours of the Biology labs and museum.

THE MILLER GEOLOGY CLUB

THE MILLER GEOLOGY CLUB was officially recognized by the Alma Mater Society in 1947. Since then the club has been a source of relaxation for the students of Queen's who are majoring in the geological sciences. At the regular meetings which are held twice a month, men from the mineral industry address the members, keeping them up-to-date on discoveries and advancements in the industry. The executive of the club hopes to initiate an annual publication, featuring the activities of the club during the school year. This year's membership is over eighty, the largest the club has had since its inauguration.

THE QUEEN'S MATHEMATICS AND PHYSICS CLUB

IN ITS ELEVENTH YEAR the Queen's Mathematics and Physics Club continued to provide students interested in the physical sciences and mathematics with speakers who are well known in these fields. Their object is to acquaint students with the nature of the work in some of the specialized branches of this wide topic. As a special event the November meeting took the form of a field trip to the Atomic Energy Research Centre at Chalk River; more than twenty made this trip. An innovation this year was the serving of refreshments after the meetings in Ontario Hall. The club is affiliated with the Canadian Association of Physicists.

THE QUEEN'S GLEE CLUB

P. Calnan, D. Sinclair, H. Hendry (Pres.), J. Bunge.

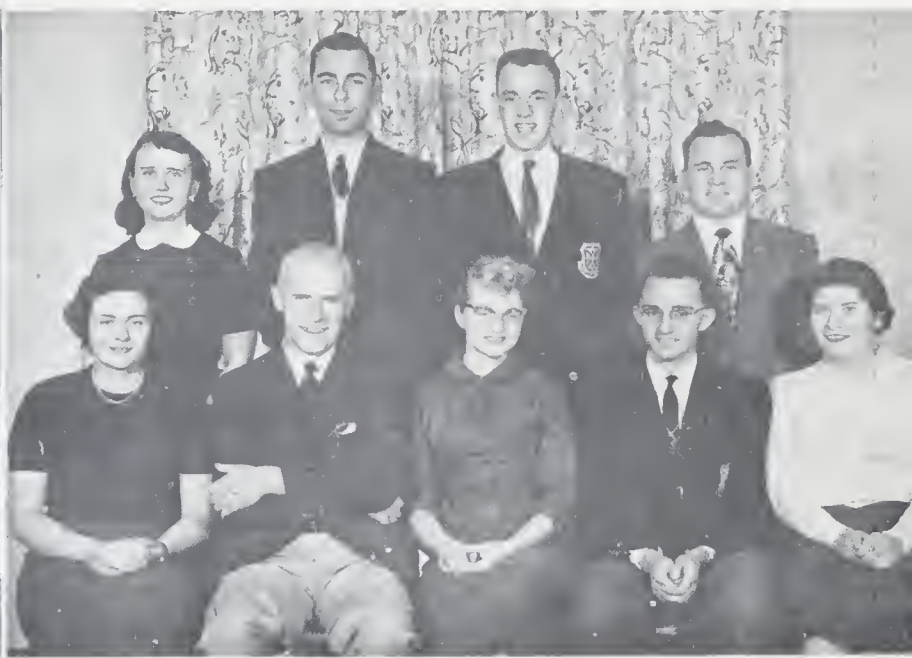

THE QUEEN'S INTERFACULTY CHOIR

E. J. Shewan, M. Smith, G. Lawrence (Pres.), J. Voaden, K. Mabee.

THE QUEEN'S JAZZ SOCIETY

T. Murray, B. Yeotes, S. Turner, D. Cowper (Pres.).

THE QUEEN'S BIOLOGICAL SOCIETY

Front Row: A. Casselman, Dr. A. S. West, M. Clay (Pres.), C. Derry, P. Longworth.

Back Row: J. King, R. Whittaker, B. Tregunna, C. Meyer.

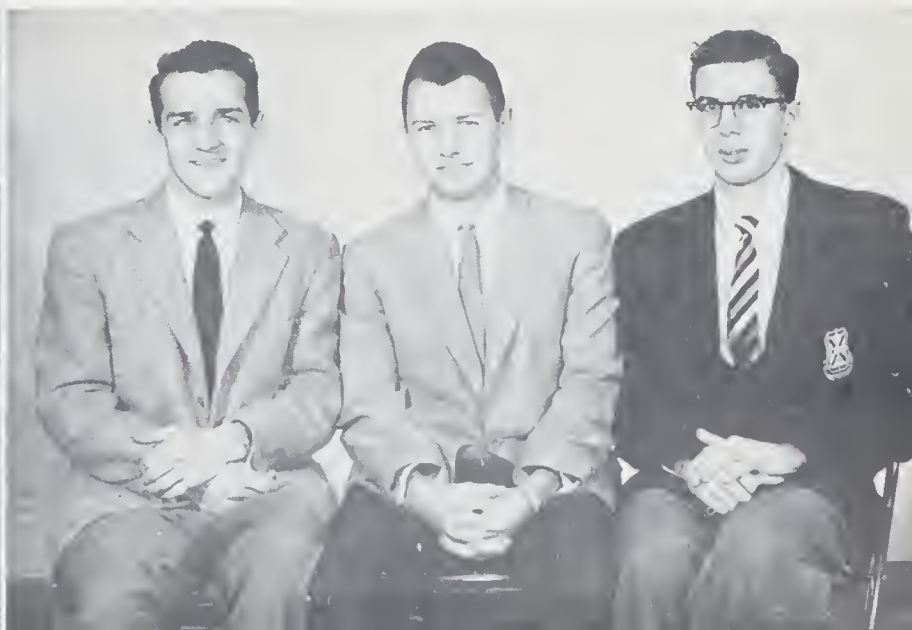

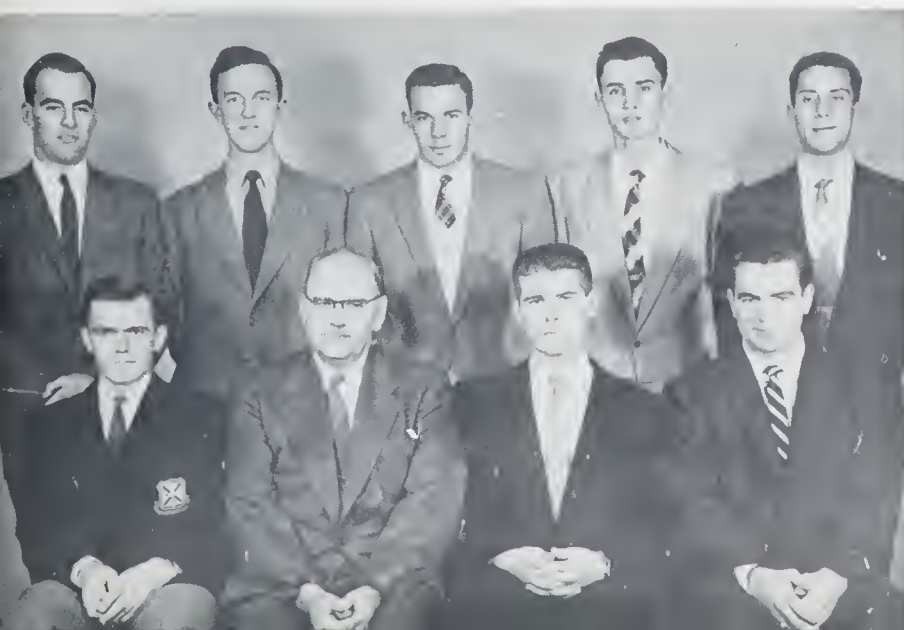

THE MILLER GEOLOGY CLUB

Front Row: A. Grunder, Prof. A. W. Jolliffe, D. Stevens (Pres.), D. McKelvie.

Back Row: B. Rochester, I. Nichol, D. Nowlan, D. Devenny, C. Burton.

THE QUEEN'S MATHEMATICS AND PHYSICS CLUB

F. Hainsworth, N. Thompson (Pres.), G. Aitken.

NEWMAN CLUB

THE NEWMAN CLUB, designed to foster a feeling of unity among Catholic students, began its year very successfully with the usual freshman reception. This year was to mark an exceptionally enthusiastic participation from the large freshman body, and the monthly dialogue Mass and Communion breakfast were well attended. As a slight change from the pattern of last year, intellectual discussion groups were held on the bi-weekly Newman Nites in the Jeanne Mance nurses' residence. The four groups this year — offering instruction in Apologetics, Psychology, Industrial Relations and Marriage Preparation — were also well attended. A social hour, which enabled members to relax in a more informal atmosphere, was held after the meetings of the Intellectual Discussion groups. The club also held an informal dance and a very enjoyable Christmas party, with special participation from our Overseas students.

Thanks to Doug. Kilgour and his capable executive, this year was a highly successful one.

STUDENT CHRISTIAN MOVEMENT

THE QUEEN'S STUDENT CHRISTIAN MOVEMENT is a non-denominational Christ-centred organization whose programme is planned to be of significance, not only to those of a religious nature and those strong in their Christian beliefs, but to all students seeking a stronger Christian faith, and interested in discussing and perusing the answers to some of life's problems. Through our study groups, supper meetings, and projects, we try to lay the foundation for our discussion, keeping before our minds the problems of the atheists and agnostics. Though not intended primarily to be a service group, we hope we have brought happiness to the patients at Rockwood Mental Hospital through our parties and social hours there.

LUTHERAN STUDENTS ASSOCIATION

"THE PURPOSE OF THIS ASSOCIATION shall be to confront its members with Jesus Christ as Lord and Saviour, with His Church, and with His call to discipleship; to bear witness in the academic community; to afford a means whereby its members may deepen and express their Christian faith; and to carry the witness of our faith into the ecumenical ventures of the student body . . ." states the constitution of the Lutheran Students' Association.

The organization seeks to promote an atmosphere of Christian fellowship where everyone can bring problems, academic and social, for discussion. Programs include consideration of the Christian student in campus academic and social situation, Christian attitudes in the world today and studies of various great religions.

CANTERBURY CLUB

CANTERBURY CLUB is the campus organization for Anglican students and is open to all students of Queen's, R.M.C. and Kingston General Hospital. The aim of Canterbury is to serve the mission of Christianity in higher education by fostering among the students a better understanding of the Faith and Practice of the Anglican Church of Canada.

During the past year meetings were held each week in the form of addresses and discussions. Topics were Science and Creation, The Missionary Frontier, the Episcopal Ministry, Church Union, Marriage, the Church and Social Work, and Alcoholism; Holy Communion was followed by breakfast in St. James Church once a month. The Bishop's reception was held early in the fall and there were two social evenings during the winter term.

QUEEN'S CHRISTIAN FELLOWSHIP

THE WORD "FELLOWSHIP" MEANS "A SHARING," "A COMMUNITY OF INTEREST." In Queen's Christian Fellowship, it is "a sharing" and "community of interest" in the claims of Christ and the Cross, by those Queen's students who realize the importance of these matters for complete and meaningful lives. Q.C.F. is but one member of the large, interdenominational Inter-Varsity Christian Fellowship family. The groups have at the core one motto which draws them all together and gives their activities a unity of purpose. The motto is "To Know Christ and To Make Him Known." To this end are directed Bible Studies, Prayer, Lectures, Studies on Missions and Social "Get-Togethers." Each University student who is a member realizes that "knowledge without God is infinitely more devastating and deadly than ignorance without Him."

B'NAI B'RITH HILLEL FOUNDATION

ON 211 CAMPUSES IN FIVE COUNTRIES, the B'nai B'rith Hillel Foundations serve as a liaison between the student body and the heritage of the Jewish tradition. Their program seeks to provide cultural, religious, social service and intergroup activities.

At Queen's, Hillel House serves the Jewish student as a "home away from home," while providing him with the opportunity of study and discussion of the faith, literature, history, thought and life patterns of his people, as well as that of the prevailing cultural milieu. The student group at Queen's is organized democratically, and shares in the responsibilities of Hillel's operation and program development, thus building the Jewish students' capacity for making valuable contributions to the campus, community and society.

NEWMAN CLUB

Front Row: Rt. Rev. J. Hanley, M. Vandewater, D. Kilgour, A. Stephens, K. MacPhail.

Back Row: E. Simpson, N. O'Connor, D. Jamarre, R. Conlow.

STUDENT CHRISTIAN MOVEMENT

Front Row: G. Gosselin, S. Minard, A. Keenleyside (Pres.), C. Newell.

Back Row: R. Clark, R. Pocklington, A. Rajnauth, D. Hart, D. Purbert.
Absent: G. Ambury, C. Pyke.

LUTHERAN STUDENTS' ASSOCIATION

W. Darker, A. Merklinger, Rev. H. Lossing, D. Rediger (Pres.), H. Hildebrandt, G. Schultz.

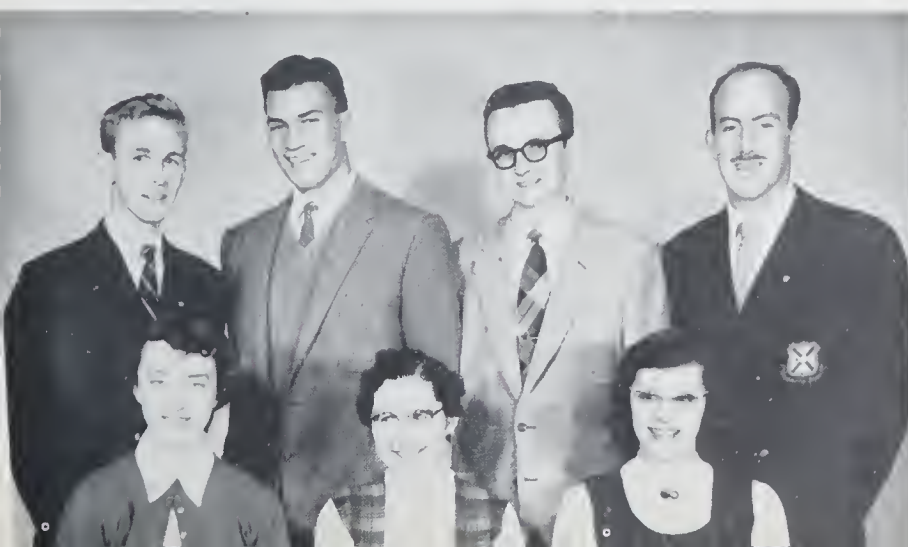

CANTERBURY CLUB

Front Row: M. Page, D. Meakin (Pres.), J. Burness.
Back Row: M. May, Professor Smithers, Rev. C. Staples, P. Masson, R. Bolton.
Absent: M. Northan, B. Hewson.

QUEEN'S CHRISTIAN FELLOWSHIP

Front Row: M. Hoy, E. Beaton, N. Snelling.

Back Row: D. Allan, Z. Dienn, B. Brown, J. Plummer (Pres.).

B'NAI B'RITH HILLEL FOUNDATION

Front Row: Rabbi J. Bassin, S. Brozofsky, H. Brown.

Back Row: S. W. Gunner, J. Simon, Eli Rabin.

FRENCH CLUB

THE CERCLE FRANCAIS is open to students from all faculties and R.M.C. For the language student and all those interested in the French language and civilization it offers an opportunity to practise speaking French and to meet informally with their professors.

Meetings this year were held twice monthly and the programme included discussions, addresses, a conducted tour through the Zacks art exhibit at the Art Centre, sing-songs and socials.

Our sincere thanks go to our president Paul Kavanaugh, our advisor Dr. Shortliffe and to Mr. Gobin.

GERMAN CLUB

THE OBJECTIVE OF THE GERMAN CLUB at Queen's is to promote a wider acquaintance with German language, literature and art among students of all faculties. The meetings featured such varied programmes as a recorded reading of Faust I and a lecture with coloured slides on modern German architecture. The annual Christmas party of the German Club has become a tradition on the Queen's Campus.

SPANISH CLUB

THE QUEEN'S SPANISH CLUB provides an outlet for all students, both those enrolled in Spanish courses and those not, to get together at various times throughout the year. By means of guest speakers and movies the members learn something about the language and customs of Spain and other Spanish speaking countries. Certain highlights of the year were a series of interesting talks given by dignitaries from various South American Embassies. This year there was an encouraging increase in membership pointing to the fact that more people are becoming interested in the Spanish language and the customs of Spanish speaking countries.

WORLD UNIVERSITY SERVICE

THE EXPANSION OF QUEEN'S W.U.S. committee's sphere of activities continued unabated this year, as W.U.S. enlarged its programme to include more educational opportunities for Canadian students. The SHARE campaign and the Treasure Van sale both were quite successful. The latter featured handicrafts from eight countries and brought admiring comments from townspeople as well as Queen's students. Queen's W.U.S. committee also initiated several new projects this year. A week-end seminar was held in November at Sharbot Lake, with representatives from several universities discussing "What's a University For?" Another new feature was the frequent campus discussions held at faculty members' homes on topics affecting students' relations with the world. Finally, a series of films were shown on different countries of the world.

N. F. C. U. S.

THE NATIONAL FEDERATION OF CANADIAN UNIVERSITY STUDENTS is a union of students comprising nearly 50,000 members across Canada. It strives to serve students by presenting their problems to governments and other national organizations for consideration. It represents Canadian students at international conferences. It sponsors national projects such as contests, interregional scholarships, travel service.

Queen's NFCUS committee is made up of representatives from Arts, Science, Levana, Medicine, Commerce and Theology. This body acts as the official bond between the national organization and the students of Queen's, it is responsible for keeping Queen's students informed on National affairs and for representing Queen's at the national and regional conferences.

AMATEUR RADIO AND ELECTRONICS CLUB

ONE OF THE MOST INTERESTING and certainly one of the most useful hobbies is that of radio and electronics. Our club stresses the practical side of electronics such as the construction and repair of radio and hi fidelity equipment. Classes are given in basic radio theory and in Morse code for those interested. Speakers and movies at the meetings inform members on topics related to electronics. This year the club room in Clark Hall has been equipped with a large selection of tools and modern precision test equipment for the use of all members.

Amateur radio is another important part of the club's activities. With the club's transmitting and receiving facilities virtually any part of the world can be contacted.

FRENCH CLUB

Front Row: S. Finstad, J. Millward, C. Cleave, D. Ryback.
Back Row: Dr. G. Shortliffe, P. Kavanagh (Pres.), H. Stollery.

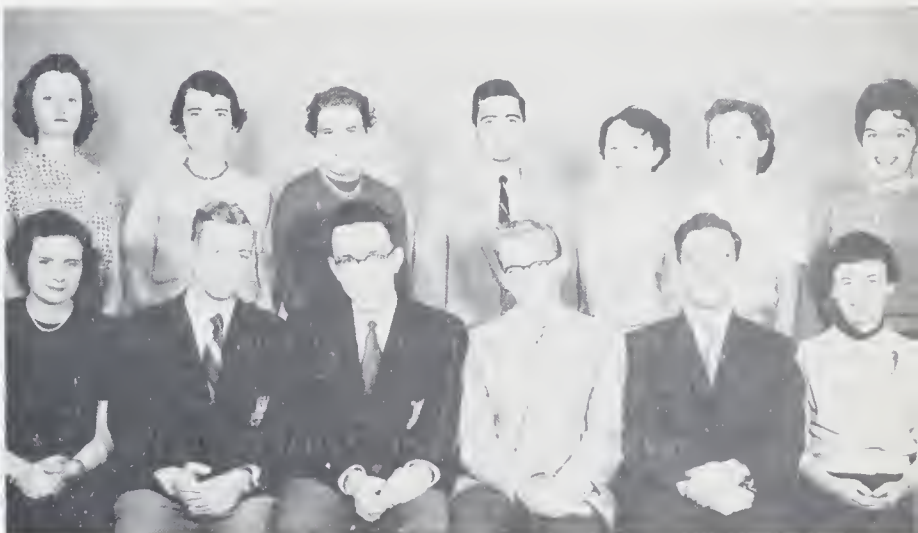

GERMAN CLUB

AMATEUR RADIO AND ELECTRONICS CLUB

Front Row: L. Parker, J. Thede (Pres.), E. Todosiev.
Back Row: R. Morrow, J. Hay, J. Sutherland, J. Knight.
 Absent: J. MacDougall.

PROGRESSIVE CONSERVATIVE ASSOCIATION

MARKING A HIGHLY SUCCESSFUL SECOND YEAR of existence, the Progressive Conservative Association of Queen's University presented a large and varied program to help stimulate political education on the campus, and presents the philosophy of the P.C. Movement in Canada.

Opening the year's activities the Association sponsored a forum "The Coming Depression" in which prominent members of the teaching staff discussed this topic. It was followed by a series of open discussions for the benefit of politically interested students where the executive of Political Clubs on the campus presented their views. During the first term, a delegate was also sent to the Ontario Young P.C. convention in Toronto.

The feature of the second term was the National Convention in Ottawa of the Combined Y.P.C. and P.C. Student Federation organizations, to which 20 delegates were sent from Queen's. This delegation was successful in passing a resolution promoting student aid by the Federal Government, impressing the convention with campus views, and electing the Association President as P.C.S.F. Regional Vice-President for Ontario.

Led by Jim Holmes, the Party Leader for the Model Parliament, the P.C. Association directed a campaign that swept the Tories in as a Majority Government, gaining 56% of the campus votes in a record turnout.

DRAMA GUILD

THE DRAMA GUILD is intended to foster student interest in dramatics by making readily available an opportunity to participate in or attend productions. In the fall term, the major production was Arthur Miller's "The Crucible." "Love and Lunacy" was chosen in the spring term. Two bills of one-act plays were also presented, and the Radio Workshop of CFRC was in full operation on Thursday nights. On February 1st the Inter-Varsity Drama League competition was held at McMaster University, with entries from many Canadian campuses.

CHEMICAL ENGINEERING CLUB

THE CHEMICAL ENGINEERING CLUB is a student organization comprised of third and fourth year chemical engineers, graduate students and any other students whose interests lie in the chemical engineering field.

The club has worked very closely with the department to obtain speakers and literature of interest in chemical engineering fields. The program this year included some non-technical topics not ordinarily encountered in the course of studies. Speakers on Psychology, Industrial Relations and Atomic Power were obtained as well as on technical topics like instrumentation and pulp and paper.

The annual field trip to various plants was taken this year in the Montreal area. We saw many industrial applications of class-room topics and had the opportunity of meeting plant personnel and discussing operations.

Dr. Clark was the staff adviser this year, and much credit is due to him for the successful year.

CAMERA CLUB

THE YEAR 1957-58 was a re-organization year for the Queen's Camera Club. Several films and demonstrations were held during the year for the benefit of the newer members and some general improvements were made in the darkroom.

The annual salon enjoyed one of its better years under the careful guidance of the salon committee with a very good entry of excellent colour slides and a better than average variety of black and white prints.

ELECTRICAL ENGINEERING CLUB

THIS YEAR QUEEN'S ELECTRICAL ENGINEERING CLUB enjoyed one of its most successful and vigorous seasons. Membership was at an all-time high.

The technical phase of the club's activities included tours to Northern Electric, the St. Lawrence Seaway and General Electric. Several very enjoyable talks were given in the fields of politics, psychology and other non-technical subjects. Some of these talks were deemed to be of sufficient interest to all engineering students and open meetings were held to which all students were invited.

CHEMICAL INSTITUTE

THE STUDENTS' CHAPTER meets spasmodically on Tuesday afternoons in Gordon Hall. At these meetings, films depicting research in chemistry and its application to present day problems are shown. Guest speakers from institutions and industrial firms give talks on aspects of the varied fields of chemistry. Since the Students' Chapter is connected with the Kingston Chapter, joint meetings are held regularly. Tours of plants and laboratories in and around Kingston are also arranged. Toward the end of the academic session a banquet is usually held. Students of the Chapter give papers on topics in special fields before the Kingston Chapter and prize winners are selected from this group. The names of all winners are engraved on a plaque which hangs in Gordon Hall.

Students in Honours and Pass Chemistry, Engineering Chemistry, and Chemical Engineering are members of the Chapter.

BEHIND THE SCENES

"Any graduate of the University or affiliated colleges is eligible for honorary membership."

SO reads the Alma Mater Society Consitution. This year of 1958 marks the one hundredth anniversary of student government at Queen's. What could be a more fitting occasion to bestow on "the-man-behind-the-scenes" the highest honour within the power of the student body to grant?

Hubert Jones Hamilton — affectionately known as Herb — received his B.A. degree from Queen's in 1932. During his years as an undergraduate he was active in the Queen's Drama Guild, in the wrestling ring and on the Journal staff writing a column entitled "Uncle Ben's" and assuming the position of Editor-in-Chief of the Queen's Journal in his final year. His interest in sports and journalism did not end upon graduation for he worked as a sports and general reporter for the 'Kingston Whig Standard'. He returned to his Alma Mater in 1937 as assistant editor of the 'Queen's Review.' A year later he assumed the titles of Secretary-Treasurer of the Alumni Association, editor of the 'Queen's Review' and manager of the Queen's Employment service. As well as running this three-ring circus Herb continued as permanent secretary-treasurer of the Alma Mater Society, which post he had accepted in 1936.

Herb Hamilton

It is for his work in this latter field, 'beyond and above the call of duty' that we wish to honour him. Every year countless students have been heard to remark "What could we do without Herb?" He is never too busy to offer a word of encouragement and his office on the first floor of the union is always open to students, individually or in groups, who seek his help and advice. He is a walking encyclopaedia of all A.M.S. and student organizations' activities since the year one and forms an invaluable link from one year to the next.

It would be impossible and presumptuous to attempt to record here the manifold ways in which members of the A.M.S. have been aided by the one man who might truthfully be called indispensable.

Therefore it was with great pleasure that the society voted at the annual meeting to grant to Mr. Hamilton at the Color Night Banquet an honorary membership and a suitable memento marking the occasion. This marks the first time in the history of the society that an honour of this nature has been accorded. It is, therefore, especially significant of the high esteem and the sincere and warm regard which the members of the Alma Mater Society hold for Mr. 'Herb' Hamilton.

Tricolor '58

honours these Queen's men and women

who have made
a special contribution
to campus life.

Their individual talents
for organization
and direction
have channeled
the energies
of various groups
towards fruitful
and worthwhile goals.

For time spent,
for willing work,
for ideas
and enthusiasm . . .

We salute you!

Go North Young Man!

ON the upper reaches of St. Mary's River at the junction of the Great Lakes is the steelworks of Algoma Steel Corporation. To the east lies the Blind River uranium mining area. Here at Sault Ste. Marie other industries are developing alongside such an important source of steel. Wide expansion during the coming years is inevitable, and this means there are golden opportunities for the future. In due course the St. Lawrence Seaway will link this expanding area with the sea-lanes of the World.

Why do successful men own life insurance?

In any field, nearly all the top men own life insurance. They realize the importance of this best and most complete way of providing financial protection. They know life insurance is the *only* way of setting up an estate immediately for whenever it will be needed in the future. The Sun Life Assurance Company of Canada, with more than 85 years' experience of personal needs, offers a wide range of policies to suit individual life insurance requirements.

CHALLENGING CAREERS

at

FOR THE ENGINEERING GRADUATE

These are some of the technical fields in which you may find an observing and rewarding career at Stelco.

- **CHEMICAL ENGINEERING** — design, process control, materials analysis, instrumentation, refractories, utilization of coal chemicals and gases.
- **ELECTRICAL ENGINEERING** — design, construction, installation, maintenance, electronics, power distribution, experimentation.
- **METALLURGICAL ENGINEERING** — quality control, research and development, processing techniques, testing, metallography, heat treating.
- **CIVIL ENGINEERING** — planning, estimates, economic studies, specifications, construction, mechanical maintenance, fabrication.
- **MECHANICAL ENGINEERING** — development, layouts, design, construction, mechanical maintenance, shop work and fabrication.
- **MANAGEMENT ENGINEERING** — yields, methods, inventory control, material handling, job classification, operation analysis.

Graduate Engineers who are interested in a solid and satisfying future will be welcomed into Stelco's Graduate Training Programme which is designed to bridge the gap between academic qualifications and industrial achievements.

Sip...Sip...Hooray!

Life looks brighter—you'll feel gayer—after the first sip of bracing Coca-Cola! Its wonderful zest gives you a quick little lift—refreshes you as nothing else can. Yes—in all the world—nothing gives you the wholesome sparkle of Coca-Cola.

Opportunity doesn't know
how to knock —
but you do . . .

Who said "Opportunity Knocks"?

Inferring of course that all we have to do is sit still and wait for "Opportunity" to amble around the proverbial corner.

It never does. You and I have to do the knocking.

If you have the capacity to develop and to assume responsibilities, then opportunities are everywhere — particularly in Canada.

At Canadian Ingersoll-Rand there are a wide variety of careers to choose from. Production, Marketing, Engineering, Accounting . . . these are just a few of the many stimulating fields.

You can find out about these opportunities by knocking at the door of C-I-R's personnel manager. He'll be glad to talk to you. Or if you're busy studying for an exam, drop him a short note to ask about details. Here's the address:

Because your ability
carries you
ahead...

explore your future
in a BNS banking
career—first

Like all Canadian business, the Bank is expanding fast.

With so many new branches opening, you'll find *promotion* comes quickly. In today's Bank of Nova Scotia—growing with Canada—there'll be more management staff . . . more executive positions . . . and we're looking *ahead* for the right sort of men to fill them.

As a regular part of your career training you'll move from post to post across Canada—may visit Europe, the U.S. or the Caribbean.

So if you're ambitious and want a career with a *real* future, talk it over with your local BNS manager. He'll be pleased to see you.

The BANK of NOVA SCOTIA

your partner in helping Canada grow

Main Branch — G. F. Kerr, Manager

ORGAN BUILDING PIONEERS

St. Joseph Cathedral
Wheeling, W. Va.
U.S.A.

While the Casavants first used electro - pneumatic action in 1890, it was not until the invention of pouch and valve pneumatics in 1895 that the sliderless organ chests replaced the old style slide chests. The pioneer invention of Samuel Casavant, with little change down through the years, now provides a standard from which the majority of the world's great organs are built.

THE GREAT NEW

Gestetner
260

How much has printing cost you in the last year? With the Gestetner you can now produce forms, letters, reports and other material in volume and at a fraction of their former cost.

Remember the 260 gives you more exclusive features than any other Duplicator but still costs no more than conventional equipment.

Dofasco

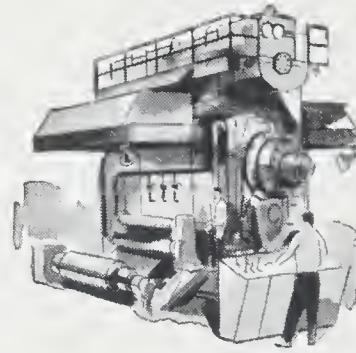

Matching modern steel demands with modern production methods ...

"Is there a **better** way?" That's a question you'll often hear at Dofasco. We intend to keep right on asking this leading question that has led to such epoch-making developments as the Continuous Galvanizing Process and Oxygen Steelmaking.

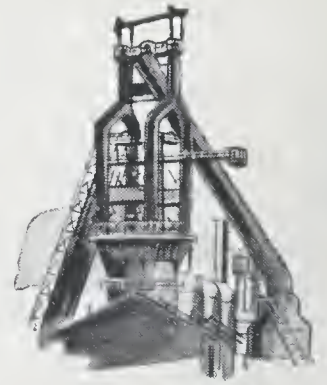

Dofasco engineers are firm believers in tomorrow . . . and are preparing **now** to meet the increased need for steel in the future.

Keeping an eye on the future is Dofasco's way of contributing to Canada's growth as an industrial power . . . and to Canada's eventual self-sufficiency in steel.

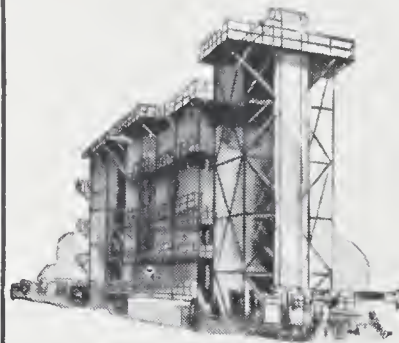

DOMINION FOUNDRIES AND STEEL, LIMITED
Hamilton, Ontario, Canada

New 2-Hi Mill and recent Cold Mill contribute to increased capacity and improved service.

Recent "blow-in" of Dofasco's No. 2 Blast Furnace doubles iron production.

New, No. 2 Continuous Annealing line helps meet demands for wider strip and faster production.

New Oxygen Steelmaking Furnaces require only minutes to convert iron into steel.

The miracle on your wall

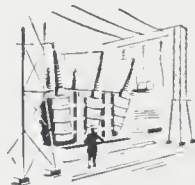

Behind the familiar wall switch lies the far-sighted planning and ingenuity of Canada's electrical industry that provides the low-cost power and efficient equipment which is helping to raise our standard of living.

When you want light in a room, you just flick a switch. It's as simple as that. And, if that minor miracle is taken for granted, consider a few of the other tasks electricity performs in the home.

It cooks complete meals while you are out—takes the labour out of cleaning, polishing, washing and ironing—keeps perishable foods in perfect condition, for months if necessary—supplies constant hot water—brings you radio and television entertainment—and helps to keep your home cosily

warm in winter and delightfully cool in summer. This is fast becoming the pattern of living in even remote Canadian homes today.

While the role played by electricity in the home naturally looms large with all of us, it should always be remembered that by far the larger part of the power generated is used by industry. In fact, it is primarily because of the availability of this dependable source of power that Canada has been able

to develop her aluminum, pulp and paper, mining and manufacturing industries to their present position—which, indirectly, adds to the prosperity of all Canadians.

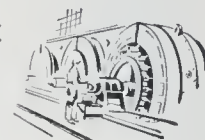

When you flip that familiar switch on the wall, have you ever given a thought to the amazingly intricate system of power equipment that lies behind it?

From the start, the story of Canada's electric utilities has been one of phenomenal increases in demand for power being constantly met, with the result that Canada has become one of the most highly electrified nations in the world. And, as always with this enlightened industry, tomorrow's needs are being taken care of by today's planning.

This Company engineers, manufactures and supplies a complete line of electrical equipment including generators, transformers, switchgear, wire and cable for the generation, transmission and distribution of electric power—as well as the motors and control, electronic devices, appliances, lamps and other products that put it to work.

We, of Canadian General Electric, take pride in the fact that electric power has become the pulse of the Canadian way of life because—as Canada's oldest and largest electrical manufacturer—we have helped to make it so.

Progress Is Our Most Important Product

*Salute
to a
great
University*

The part that Queen's University has played, and is playing, in the development of our nation cannot be over-emphasized. From playing fields to the realms of highest scholastic achievement, Queen's contribution has been both unique and important — adding immeasurably to Canada's social, economic and spiritual life. We at "CLC" are proud to salute Queen's.

EATON'S OF CANADA

... vast, exciting, vigorous, like Canada itself

You'll find Eaton's at the Pacific coast where gardens are gorgeous and forests are fabulous. You'll find Eaton's in Newfoundland where Atlantic icebergs loom on the skyline and the land is rich with iron. Eaton's is here, there and everywhere, across Canada from ocean to ocean—on the French-speaking banks of the St. Lawrence; in the big cities; in the market towns and mining towns; alongside the wheatfields and oilfields; on the fringe of the prairies and the foothills of the Rockies.

EATON'S is the largest department store organization in the British Commonwealth: Department Stores; Mail Order Centres with Catalogue circulation in the millions; Order Offices; Factories . . . Eaton's is as Canadian as its 85% bought-in-Canada merchandise; as cosmopolitan as the famous products of other lands imported through buying offices in the British Isles, France, West Germany, and the U.S.A. . . . Like Canada, Eaton's dates back to mid-Victorian days—founded in Toronto 1869, by the grandfather of the present Head of the Company.

A Fair Offer

If you will put a Jenkins Valve, recommended for your particular service, on the worst place you can find — where you cannot keep other valves tight — and if it is not perfectly tight or it does not hold steam, oil, acids, water or other fluids longer than any other valve, you may return it and your money will be refunded.

Jenkins Bros

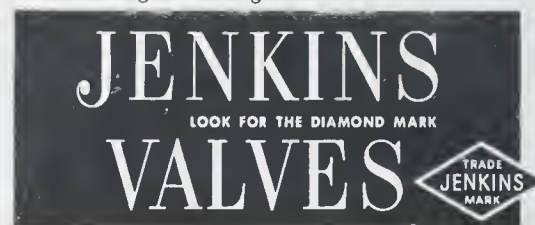

'A Fair Offer', first published in 1869, was more than a warranty of superior performance. It charted a course for fair dealing from which Jenkins Bros. Limited has never veered.

By making valves that measure up to this forthright offer, Jenkins has continued to set the highest standards for quality.

'A Fair Offer' is republished, at regular intervals, as our pledge that those standards will always be observed.

An advertisement for Burlington Steel Products. On the left, a vertical list of products is enclosed in white ovals: "Rail Steel Reinforcing Bars" (with "PLAIN OR HI-BOND" in small text below), "Forged Steel Grinding Balls", "New Billet Steel Bars", "Steel Fence Posts", and "Rail Steel Tubing". To the right of this list, the word "specify" is written in a small, sans-serif font, followed by the "Burlington" logo in a script font, and then "STEEL PRODUCTS" in large, bold, sans-serif capital letters. At the bottom of the advertisement, the "Burlington" logo is repeated in a large script font, with "BURLINGTON STEEL CO., LIMITED" and "BURLINGTON CANADA" in small capital letters below it. At the very bottom, there is a small, detailed illustration of a steel mill or factory complex.

**THE ROYAL BANK
“2-ACCOUNT PLAN”**

helps you to save

ONE FOR SAVING . . . Regular savings deposits have a much better chance to grow into a healthy bank balance when left strictly alone to accumulate, with interest, in your Royal Bank SAVINGS ACCOUNT.

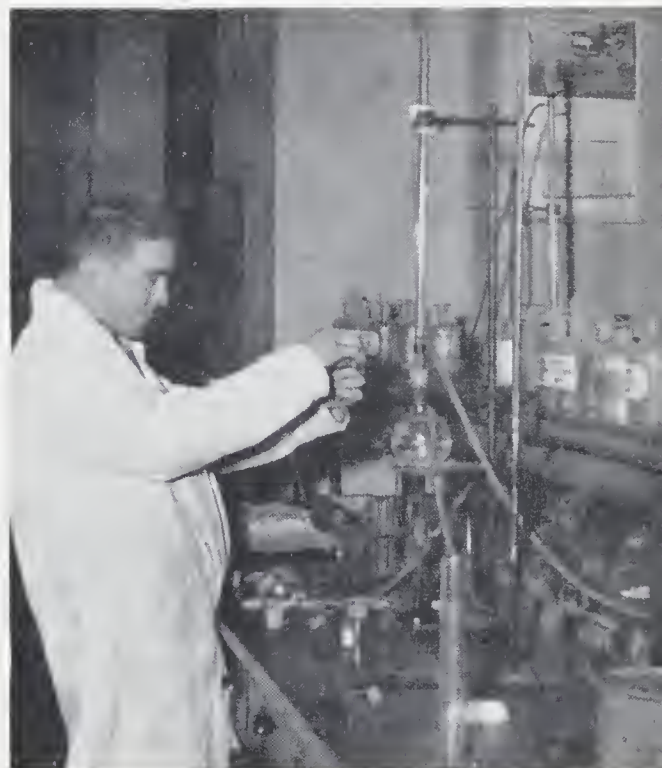

“But”, you say “I’ve got bills to pay and cheques to write. How can I keep my hands off it?”

Quite simply . . . when you operate a second, separate PERSONAL CHEQUING ACCOUNT.

ONE FOR PAYING BILLS . . . For paying bills by cheque you open a Royal Bank PERSONAL CHEQUING ACCOUNT. It’s businesslike, saves you time at the bank, can save you money on cheques, too. And every three months the bank mails you a complete printed statement of your account, plus your cancelled cheques . . . valuable to you as proof of bills paid.

This ROYAL BANK “TWO-ACCOUNT PLAN”, helps you save . . . puts your personal and household accounts on a business-like basis. Try it. Full particulars at every branch.

TRICOLOR '58

wishes to thank

- Mr. Wallace Berry and the Union House Council for their generous contributions toward the printing of the coloured photograph on page 4.
- Herb Hamilton and Sylvia Pearen for their willing assistance at all times.
- Don Kuehner and Dunc Currie for the division page sketches.
- all the people who wrote special articles.
- Dave Dewar for special photographs.
- students who contributed candid photos.
- the sales staff for their energy and enthusiasm.
- Chuck Finley for supplying us with advance proofs of Who's Where.
- Marie Pollit for her excellent work on the graduate photos.
- John Winterton, George Bailey and Danny Wong for photographic assistance.
- Vern Napier of Mahood's for obtaining those photographic supplies which we always needed at once.

The staff appreciate your co-operation and hope you enjoy this issue of Tricolor.

Without advertising and advertisers, it would be almost impossible to produce this yearbook. The absence of advertising would necessitate a considerable increase in the price of the Tricolor to each student.

To show your appreciation, we ask you to patronize our advertisers wherever possible.

THE QUEEN'S CREST on the cover of Tricolor '58 is the official University Crest. It was registered a few years ago with the College of Heraldry, and the original painting now lies in the College vaults. Since the true colours are fading, it is difficult to register accurate shades. The scarcity of copies of the official crest, and the indefinite colours account for the multiplicity of crests which appear on University calendars, cards, blazers, and jewellery. Tricolor '58 is proud to display the official Queen's crest on its cover.

IN MEMORIAM

MILTON RITCHIE DOWD, MEDICINE '60
KINBURN, ONTARIO
FEBRUARY 8, 1958

JAMES WATSON HICKEY, SCIENCE '58
MARMORA, ONTARIO
MARCH 22, 1958

The Editors of the Tricolor join the many friends of these students in expressing deepest sympathy to their families. Their sudden deaths have shocked and saddened us. We are grateful for all that they were and all that they did.

"Blessed are the dead that die in the Lord; even so, saith the Spirit, for they rest from their labours and their works do follow them."
